

Development of District Disaster Management Plan District: Cox's Bazar.

Developed By
District Disaster Management Committee, Cox's Bazar

Coordination by

Bamgla-German Sampreeti (BGS)

August, 2014

Supported by
Comprehensive Disaster Management Programme (CDMP-2)
Ministry of Disaster Management and Relief

Empowered lives.
Resilient nations.

Some views of participants in the Validation Workshop on District Disaster Management Plan held at Hill Down Auditorium of Cox's Bazar District.

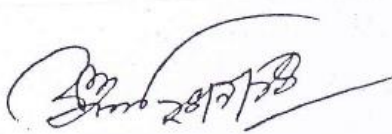

Preface

The increasing trend of global warming and climate changes has been creating natural disasters in some parts of the world constantly. In context of geographical location, Bangladesh has become one of the most vulnerable country of the world, and the people of the country often suffered by various natural disasters.

Cox's Bazar being a coastal region of Bangladesh, every year natural disaster like; cyclone, tornado, tidal surge, land slide, river erosion, flash flood, salinity are the common phenomena for the inhabitant of the district. For human being, it is quite impossible to prevent natural disaster completely. Yet, united effort, comprehensive planning and proper awareness rising, may reduce the destruction in maximum.

With that objective, the Ministry of Disaster Management and Relief has taken initiative under Comprehensive Disaster Management Programme (CDMP-2) to develop a Comprehensive Disaster Management Plan, in cooperation with non government organization. As such, with the support of Disaster Management Committee of Cox's Bazar district, a non-government organization "Bangla-German Sampreeti (BGS) has developed a Disaster Management Plan" for Cox's Bazar District.

I hope the plan will make an important contribution towards disaster management planning, response, risk reduction and the planning activities during and after disaster. I thank to all concern involved for developing the disaster management plan.

Md. Ruhul Amin
Chairman,
District Disaster Management Committee
And
Deputy Commissioner
Cox's Bazar

1.1 Introduction:

Bangladesh is a most populated country of the world. In the context of geographical formation and location, the country is treated as disaster prone area. Natural disaster is a common phenomenon for the country, yet, it is a significant obstacle in the development of the country. For Bangladesh, cyclone, tornado, tidal surge, flood, drought, river erosion, earth quake, landslide, thunder storm etc are remarkable. In reality, natural disaster can be protected by the human being. However, It is quite impossible to make full protection and prevent the natural disaster by human efforts. However, through the history of disaster and experiences, it has found and observed that the unexpected destruction and losses can be reduced by adopting for awareness raising on disaster management. Considering the fact and reality, the ministry of disaster management and relief has taken initiative the Comprehensive Disaster Management Program (CDMP) in line with the Law and SOD of Ministry of Disaster Management and Relief, which has become a milestone in the perspective of disaster management in Bangladesh.

Almost all the districts of Bangladesh are affected by the natural disaster however, the districts of coast line areas affected mostly in comparison to the other districts of the country. While the Cox's Bazar district is the worst affected district among the 19 coastal districts of country. There are 8 Upazila under Cox's Bazar district. Being flowed beside the Bay of Bengal, with 3 isolated Islands, the district is mostly concern of natural disaster like; cyclone, tidal surge, flash flood, river and canal erosion, water logging, heavy rainfall etc. Almost every year, the natural disasters have hit the areas and made enormous destruction to the life and livelihood of inhabitants. Considering all the aspects and realities of the locations, initiative for development of a comprehensive disaster management plan to reduce the overall risk and hazard seems to be very vital.

1.2 Objective of the plan

With the increasing tread of global climate change, and unplanned urbanization, expansion of industries, filling up of river and canal, de-forestation, destruction of mangrove forest, with many forms of activities in Bangladesh it has observed the rising trend of natural disaster like; cyclone, thunder storm, tidal surge, flooding by the high tide, excessive rainfall, flood, flash flood, drought, scoring heat etc. all of the country. Being closet area to the Bay of Bengal, Cox's Bazar district is affected by natural disaster almost every year. And the community people are at the high risk and vulnerable to the disaster. To identify the possible risk of disaster and vulnerability, and take up effective measures and plan, the initiative for development the District Disaster Management Plan has taken. The specific objectives of the plan is as follows:

- ❖ Building mass awareness in the family and society on disaster reduction and assist the family, society, local administration & district administration to take up realistic plan and initiative in reducing risk and vulnerability.
- ❖ Maximum utilization of local resources in local initiative for rick reduction and developing systematic implementation and management.
- ❖ Exercise and implementation of locally initiated plan for removal of wreckage, rescue, need assessment, relief and instant rehabilitation of the affected.
- ❖ Treated as strategic paper for Upazila Disaster Management.
- ❖ The DM to be treated as Common Plan for the disaster management committee and other relevant stakeholder (government, international agency, national NGOs and donor body).
- ❖ This plan will assist the stakeholders of disaster management committee in planning and implementation

- ❖ Enhancing the sense of ownership, shared responsibility and active participation in the disaster planning by the relevant stakeholders of community.

1.3. Introduction to the Cox’s Bazar district

Cox’s Bazar district located to the South-Eastern boundary line of Bangladesh. It was known as Palongi, Paynowa, Arakanese etc. In the passage time of history and evolution, the area was came under regime of British rule during 1799 and Captain Hiram Cox, military officer was deployed as superintend of the region. During his regime, he established a bazaar (market) on the bank of Kakhali River and he named the bazar after last part of his name. with the passage of time, the area termed as Cox’s Bazar according to the name of the bazaar.

Cox’s Bazar surrounded by Bay of Bengal in the South and West, Chittagong district in the North, while some parts of Bandarban district and Myanmar in the East. As attraction of tourists, Cox’s bazar has the longest sea beach of the world, with panoramic view, the St. Martin Island, Bangabandhu Shapari park, Bashundhara park, natural fountain at Himchari, Adinath Hindu Mondir, Buddhist temples in Ramu, windmill in Kutubdia and Martin well in Tefnaf notable.

1.3.1. Geographical location of Cox’s Bazar

Cox’s Bazar is a composition of Island, river, hills and flat land in the basin of Bay of Bengal. The district is located by Bay of Bengal in the South and West, Chittagong district in the North, while some parts of Bandarban district and Myanmar in the East. Cox's Bazar District has an area of 2491.86 km². It is located at 21°5'0"N 91°23'0"E

In the geographical context Cox’s bazar has a unique diversity with flat land in many areas, high land and hilly areas on the others, while there are river, canal and vast sea. The high land hilly areas with abundant forest and coast line adjacent lowland of Cox’s Bazar district suitable for high yielding rice cultivation. The soil formation of the region is mainly of sand, atel and doas. The adjacent low land areas of sea side are mostly suitable for salt cultivation and shrimp culture.

As resources of the district there is the longest of the world, mountain, reserved forest, fish, river, water-ways, plaintive trees, fertile land, and mangrove and tamarisk forests. To mention as Island areas; the Moheskhal, Kutubdia, Sonadia, Dhalghata, Matarbari, Shahpureer and St. Martin are famous while, Matamuhuri, Bakhali, Reju, Kuhelia and Naf rivers are significant of the district. Cox’s Bazar district about 100 kilometers from Chittagong district.

1.3.2. Area

Cox’s Bazar district has total area of 2,491.86 kilometers. The district consists of 8 Upazilas namely Cox’s Bazar Sadar, Ramu, Mohexkhali, Ukhia, Teknaf, Chokoria, Pekua and Kutubdia. There are 4 pouraschava with 39 mohalla, 71 unions, 188 mouzas and 992 villages of the district.

The following table shows the name of Mouza based on Union and Upazila:

Upazila	Union & Pourashava	Name of Mouza (Union and Pourashava wise)
1. Chokoria	Khutakhali	Bahultoli, Fulchori, Jangal Khutakhali, Mita Kochhopia, Purnogram
	Dulajara	Baghachaori, Dulhara, Paglirbil, Ring Vong
	Fashiakhali	Pankhali, Fasiakhali, Ghunia, Hajian, Rajarbil, Uchitar Bill
	Bomu Bilchari	Bom, Bilchori

	Surajpur Manikpur	Manikpur, Surajpur
	Kakra	Paithon, Kakra, Lotni, Nolbila
	Lakharchor	Lakkharchor
	Chiringya	Chiringa, Paglarkata
	Kaierbil	Chota Veola, Koierbil, Kilsorok, Kojakhali
	Boroitali	Boitoli and Pohorchada
	Harbang	Harbang(Reserved Harbang)
	Shaharbil	Mizghona, Rampur, shaharghona, Purba Bono Veola, Pascim Bono Veola
	Purbo Boro Veola	Purbo Boro Beola
	Veola Mankchar	Betua, Veola Manikchaor
	Konakhali	Konakhaler Ghona
	Demushia	Demoshia
	Pascim BoroVeola	Pascim Boro Veola
	Bodorkhali	Bodorkhali Ghona
	Chokoria Pourashava	Batakhali, Bhora Muhuri, Khuja Nagor, Binamara, Koraiya Ghona, Kuchpara, Puk Pukuria, Digor Pankhali, Nijpan Khali, Palakata, Chiringya, Kakra
2. Pekua	Pekua Sadar	Pekua, Mehernam
	Rajakhali	Rajakhali
	Barbakia	Barbakia
	Mognama	Mognama
	Tuitong	Tuitong, Batali, Sonaichori
	Ujanvatia	Koroiyadia, Ujatia
	Silkhali	Shilkhali
3. Kutubdia	Uttar Dhurong	Uttar Dhurong, Char Dhurong
	Dakin Durong	Dakkin Dhurong
	Lemshikhalli	Lemshikhali
	Kayerbil	Kayerbil
	Borgop	Borgop
	Ali Akbar Dail	Ali Akbar Dail, Rajakhali and Khudiyer Tek
4. Moheskhali	Materbari	Materbari
	Dhalghat	Dhalghat
	Kalarmarchara	Kalarmarchara, Kaligonj, Jhapua, Enuskhali, Uttar Nolbila
	Hoanok	Hoanok, Amaboshyakhali, Horiyerchar, Hetalia, Panirchar, Kerontoli
	Shaplpur	Deneshpur, Shaplapur, Mukbeki, Nunachari and Khas Mouza
	Boro Moheskhali	Boro Moheskhali, Jagiraghona, and Fakiraghona Mouza
	Chota Moheskhali	Choto Moheskhali, Pahar Thakurtola, Dakkin Nolbila, Shipahirpara Mouza
	Kutubjum	Ghatibhangha and Kutubjum Mouza
	Moheskhali Pourashav	Gorokghata, Putivila and Hamidardia Mouza
5. Cox's	Jhilonja	Jhilonja and Khurulia
	Patli	Patli Machuakhali and Totokkhali

Bazar Sadar	Machuakhali	
	Khurushkul	Khuruskul and Tateya †
	Chofaldandi	Chofaldandi
	Varuakhali	Varuakhali
	Pokkhali	Gomatoli, Eshakhali and Pokkhali
	Edgah	Vumriyaghona, Machuakhali, Jangal Machuakhali and Edgah (parcial)
	Jalalabad	Edgah (parcial)
	Islamabad	Boalkhali, Gozalia and Satjula Kata
	Islampur	Islampur
	Cox's bazar sadar	Cox's bazar sadar
6. Ramu	Edgor	Jangal Edgor and Edgor
	Kawarkop	Monirjhel, Sonaichori, Moishkum, Kawerkop, Lord Ukhia ghona and Ukhiaer ghona
	Khuniapalong	Pechardep, Goalierpalong, Dowapalong, Khuniapalong, Dhechuapalong and Dariyerdhighi
	Joalianala	Joalianala, Nonachori, Uttar Mitha Chori and Nonda Khali
	Kochhopia	Kochopia and Dakhin Kochopia
	Dakin Mithachori	Dakin Mithachori, Chendya and Umkhali
	Gorjonia	Gorjonia, Jangal gorjonia and Pascim Gorjonia
	Rajarkul	Rajarkul
	Chakmarkul	Chakmarkul
	Rashid Nagor	Dhalirchara, Jangal Dalirchara and Ultakhali
Fatekharkul	Fatekharkul, Hitupi, Merunlowa and Sreekul	
7. Ukhia	Jaliapalong	Jaliapalong and Inani
	Ratna palong	Ratna palong
	Holodia Palong	Holodia palong, Moricha palong, Paglirbil and Rumka Palong
	Raja Palong	Ukhia, Raja Palong and Wala Palong
	Palongkhali	Palong Khali, Ukhia Ghat and Ukhier Ghat Reserved Forest
8. Teknaf	Woikhong	Midle Nila and Uttar Nila†
	Nila	Dakkin Nila
	Teknaf Sadar	Longorbil, Teknaf
	Sabarang	Sabrang and Shahpurirdeep
	Baharchara	Borodail and Shilakhali
	St. Martin	St. Martin
	Teknaf Pourasava	Kulalpara and Islamabad

(Source-Land Register Officer & UP Office)

1.3.3 Population:

The total population of Cox's Bazar district is 23,81,816. Whilst male number is 12,16,641, female 11,65,075, children 9,74,131, old aged 46,160 and 8,932 persons with disabilities. The per kilometer population density recorded 919 persons. There are a total number of 4,15,954 families in the district, while the total voter number recorded 12,03,528.

The total number of segregated population is given as per Upazila:

Upazila	Male	Female	Child (0-15)	Old (60+)	Disabled	Total	HH	Voter
Chokoria	2,48,829	2,44,720	1,96,053	7,310	6,906	4,93,549	88,391	2,51,133

Pekua	89,629	88,506	71,931	4,473	1,618	1,78,135	31,844	93,510
Kutubdia	66,564	63,544	50,765	2,760	2,254	1,30,108	22,587	74,607
Moheskhal	1,72,193	1,61,626	1,20,497	5,884	4,402	3,33,819	58,177	1,88,528
Cox's bazar	2,52,268	2,26,848	2,10,838	5,949	5,216	4,79,116	82,683	২,২২,৮৩৫
Ramu	1,40,187	1,36,698	1,10,521	4,944	3,514	2,76,885	47,904	1,39,801
Ukhia	১,০৪,৫৭৮	১,০৬,৭৫৫	৯২,৫৫৫	১০,১৬১	১,৯১২	২,১৫,৩৩৩	৩৭,৯৪০	১,০৬,৪৪৫
Teknaf	1,38,393	1,36,478	1,20,971	4,679	2,699	2,74,871	46,328	1,26,669
Total	12,16,641	11,65,175	9,74,131	46,160	28,521	23,81,816	4,15,954	12,03,528

1.4 Infrastructure & relevant data in brief:

1.4.1 Infrastructure

Embankment:

Under the 8 Upazilas of Cox's Bazar district there are 556.55 kilometre long embankment as recognized by the water development board which are segmented under 8 polders divided into 20 sub-polders. These embankments are protecting adjacent areas of sea shore, Islands, low lands and canals from tidal surge and high tide. There are 7 rubber dams in the district which are facilitating irrigation opportunities of farmers. Brief description of embankment is enclosed for each Upazila separately.

Kutubdia Upazila : Under the Upazila there are 40.12 kilometre embankment. The 6 unions of the Upazila are surrounded by the embankment of the Island. The embankment was constructed the Water Development Board under polder no. 71 which to protect the Island from cyclone hit and tidal surge affect. It is 10-14 feet wide and 7-12 feet high.

Pekua Upazila- There are 128.52 kilometre embankment under the Pekua Upazila. These embankment are spiraled in the unions of Mognama, Ujatia, Rajakhali, Barbakia, Shilakali, constructed by the Water Development Board under polder no 64/2A and 64/2B are mostly 8-12 feet wide and 6-10 feet high. There are 4 kilometre under Matamuhuri irrigation project and 84.40 kilometre length rubber dam under the Upazila.

Chokoria Upazila- Under this Upazila there are a total of 134.70 long embankment in the whole area. The water development board constructed these embankment under polders no 64, 65A, 65A-1, 66/A-3, 65/4 and those are located under the unions of Bodorkhali, Konakhali, Demushia, Fashikhali, Kakra, Surajpur, Manikpur, Lakhapur, Chiringha, Harbang chora, Shaharbil, Purba Boro Veola, Veola Manikchor, Pascim Boro Veola and on the river Matamuhuri of Chokoria Pourashava. These embankments are 8-12 wide and 5-12 high. Apart from these, there are 2 rubber dam under Bakgujrar and Palakata areas covering 233.5 km and 168.5 km respectively.

Cox's Bazar Sadar Upazila- A total of 100.91 km embankment in the Upazila which are located under Unions of Kurushkul, Islampur, Islamabad, Bharuakhali, Jhelongja, Patlimachura Khali, and Sadar Upazila. These embankments were constructed by the Water Development Board under polders 66/1, 66/2, 66/3 and Cox's Bazar Municipality protection embankment, and they are mostly 8-14 feet wide and 6-12 high. Apart from these there are 2 rubber dam on Bakkhali river and Lorabak canal of Edgah union.

Ramu Upazila- under the Upazila there is a 18 km long embankment to protect the Bakkahli river. Apart from these 41 embankments are there covering a length of 140.5 km in the Upazila which was constructed by the Local Government authority. There are also 2 rubber dam under the Upazila.

Teknaf Upazila- A 58.60 kilometre long embankment under the Upazila which are located at the Unions of St. Martin, Nila, Sabrang, Teknaf, Baharchora and Teknaf Pourashava which were constructed by the Water Development Board under polder of 67, 67A, 67B, and most embankments are 8 to 12 feet wide and 5 to 12 high.

Switch gate:

Under the 8 Upazilas of Cox's Bazar district there are a total number of 250 switch gate / regulator constructed by the Water Development Board. These switch gate and regulators were establish to use for water extraction of river, canal and embankment and to control the water flow as well. The switch gates are Pekua-52, Chokoria-61, Cox's Bazar Sadar-59, Kutubdia-10, Moheshkhali-36, Ukhia-2 and Teknaf-30. It should be mentioned here that 155 switch gates require renovation.

Bridge:

There are 898 bridges under 8 Upazila of Cox's Bazar district. These bridges have been constructed by the LGED, Roads and Highways on river, canal of different locations to facilitate for better communication, public movement and to make better extraction and irrigation of water. The bridges located at Pekua-55, Chokoria-141, Cox's Bazar Sadar-117, Ramu-173, Kutubdia-58, Moheshkhali-120, Ukhia-212 and 22 in Teknaf Upazila as well.

Culvert

There are 2760 culverts under 8 Upazila of Cox's Bazar district. These culverts have been constructed by the LGED canal of different locations of villages to facilitate for better communication, public movement and to make better water extraction. The culverts located at Pekua-250, Chokoria-432, Cox's Bazar Sadar-449, Ramu-376, Kutubdia-193, Moheshkhali-282, Ukhia-412 and 366 in Teknaf Upazila as well.

Ghat/Jetty:

There are 28 ghat or jetty in the district. These ghat or jetties are being used as station or stoppage of different water ways. In Kutubdia there are 5 ghat/jetty which are; Ali Akbar Jetty, Borgop ghat/Jetty, Darbar ghat/jetty, Uttar Dhurong ghat/Jetty and Akbar Boli ghat/jetty (wooden). Under Moheshkali Upazila there are 8 ghat/jetty. They are; Gorakghat jetty, Adinath Jetty, Shaplapur ghat/jetty, Shaker Mohammad Kata Jetty, Jemghat Jetty, Materbari Rajghat Jetty, Dhalghat Shapmarardail ghat/jetty, Muhurighona ghat/jetty, Bohnakata ghat/jetty. Under Teknaf Upazila there are 5 ghat/jetty, and they are; Teknaf port, Teknaf bazat ghat, St. Martin ghat, Nila Ghat, Sabrang Ghat. Under Sadar Upazila there are 3 ghat or jetty which more bigger and busy. They are 6 no. Jetty, Chofaldandi ghat and Kostura ghat. Under Chokoria Upazila there are 4 ghat/jetty. They are; Bodorkhali jetty ghat, Malomghat jetty, Bodorkhali 3 no ghat jetty and Shariar bill ghat. Under Pekua Upazila there are 3 ghat/jetty, such as Mognama ghat, Ujatia ghat and Rajakhali ghat.

Road/Highway:

There are a total of 4,984.71 kilometers long highways, pucca road, HBB road and village road located in different Upazilas of Cox's Bazar district for public communication and transportation all the district. These roads and ways help the population for easy movement and communication with different Upazilas, unions and villages. Besides, there are sufficient HBB and muddy road for internal movement in villages. The detailed of roads are illustrated below:

- Total length of Road : 4,984.71 kilometre
- Total Pucca Road : 859.82 kilometre
- Total village road : 3,047.34 kilometre
- Total HBB road : 926.55 kilometre

A segregated number of road and highways noted in Upazila wise:

SL	Upazila	Total road	Pucca road	Village road	HBB Road
01.	Chokoria	927.85	221.15	432.69	204.01
02.	Pekua	448.19	61.41	280.42	106.36
03.	Kutubdia	280.00	74.00	124.00	81.50
04.	Moheskhali	311.76	71.69	163.47	76.60
05.	Cox's bazar	1,084.13	179.50	829.00	75.63
06.	Ramu	575.98	50.38	442.49	83.11
07.	Ukhia	737.00	97.50	417.00	225.00
08.	Teknaf	619.80	104.19	358.27	74.34
	Total:	4,984.71	859.82	3,047.34	926.55

Irrigation System:

In the Cox's Bazar district the farmers use tube-well, LLP and shallow water pump for irrigation during robi rice cultivation. The ordinary people install and use ordinary tube well for meet up their household activities and ensure drinking water. Deep tube wells are mostly installed for household purpose. In all over the district a total of 6,167 ordinary tube well, deep tube well – 2,578 and the number of LPP is 2,718. In the depth the ordinary tube well gets water in the range of 90-100 feet deep while deep tube well require 500-800 feet in an average. For water irrigation there are 7 rubber dam in the Cox's Bazar district. The detailed of classified wells are given in the table:

Upazila	Deep Tube well	Ordinary Tube well	LLP	Remarks
Chokoria	425	1,350	1371	In addition to these, the farmers construct temporary dam in the small canal for irrigation during winter season. Some people organize diesel and electrical power-pump for irrigation purpose in the villages.
Pekua	85	85	450	
Kutubdia	3	365	145	
Moheskhali	207	945	7	
Cox's bazar	111	1,025	255	
Ramu	352	740	257	
Ukhia	1,395	1,631	186	
Teknaf	-	26	47	
Total:	2,578	6,167	2,718	

Haat Bazar

To meet up the needs and requirement of the ordinary people and traders, under Cox's Bazar district a total of 175 haats or bazaars have gradually been organized and established in the process of time. A description of bazaar is given below as per Upazila.

Chokoria Upazila

There are 39 haat and bazar under the Upazila. Play ground

Play group plays an important role during different disasters, specially, during cyclone and flood people take shelter in the play ground of high land. Under Cox's Bazar district there are 182 play grounds. The names of the play grounds are given according to Upazila.

Chokoria upazila-there are 45 playing grounds in the Upazila. They are; fields of Chokoria government boys high school, Chokoria Central High School, Chokoria Korak Bidyapit, Pakalta high school, Kisoloy Adarsho Shikkha Niketon, Khutakhlai high school, Kohopia play ground, Dulhajara Memorial high school, Dumkhali Kriyachokkrra ground, dulahajara Christian Memorial high school, Cha Bagan high school, Rong Mohal primary school, Maizpara primary school, Community Centre playing ground, East Dumkhali playing ground, Dulhajara college field, Fasiakhali Rashidia high school field, Gunia high school field, Tulatoli playing field, Pukpukuria primary school field, Bodorkhali colonization high school field, Bodorkhali college field, Al-Hazra high school field, Dorbesh kata high school field, Elisia Jomila Begum high school field, Demusia high school field, Shaharbil high school field, Nurul Amin Chowdhury high school field, shaharbil Madrasha field, J M Missionary high school field, Siderpara playing field, B M Chor high school, Bohdarhat high school field, Kotakhali high school field, Chokoria college field, Lakkherchor government primary school field, Shahamorabas high school field, Kakra primary school field, Kakra primary school, Surajpur primary school field, Dakkin Manikpur primary school field, Koyerbil high school field, Boraitoli high school field, Boraitoli primary school field, Dandi bazar primary school field. During the disaster these fields are used for taking shelters of cattle head, storage of goods and centre for relief distribution.

Pekua Upazila- under this upazila there are 12 playing grounds. They are; Pekua stadium, Ziaur Rahman Upakulio college field, Barbakia community centre field, Rajakhali high school field, fojunessa high school field, Rajakhali Junior school field, tuitong high school field, Tuitong Botoli playing field, Tuitong Sonaichori primary school field, Shilakhali high school field, Shilakhali primary school field, Mognama high school field. During the disaster these fields are used for taking shelters of cattle head, storage of goods and centre for relief distribution.

Kutubdia upazila: there are 20 playing grounds under Kutubdia Upazila. These are; Uttar Dhurong union Akbar bolirpara Efad Killah field, Uttarn Bidhya Niketon field, Kalarmapara Efad Kellah field, Moglalpara Efad Kellah field, Dakkin Dhurong union Pechar baper para field, Dhurong Kacha Efad Kellah field, Dhurong high school field, Gainkata Efad Kellah field, Sadoruddin high school field, Asa hajaripara Efad kella field, Lemshikhali high school field. Koyerbil efad kella, Koyerbil Ideal High school field, Moddya Koyerbil efad kella field, Khilchori Efad kella field, Kutubdia Adarsha high school field, Mogdail puraton cyclone centre field, Ali Akbar dail high school field, Haider para efad kella field, Sondipipara Efad kella field, Mosraf ali Sidderpara field. During the disaster these fields are used for taking shelters of cattle head, storage of goods and centre for relief distribution.

Moheshkhali Upazila- there are 29 playing grounds under the Upazila. These are; Kutubjum Adarsha high school field, Apsur high school field, Kutubjum Ulum dakhil madrasa field, Boro Moheshkhali Buton bazar field, Boro dail Madrasa field, Munshi dail field, Nuton bazar primary school field, choto Moheshkhali secondary school field, Suturia primary school field, Hownok time bazar government primary school field, Hoanok Bahumukhi high school field, Panirchora Adarsha high school field, Hoanok Rashidia madrasa field, Hoanok college field, Enushkhali high school field, Kalarmarchara govt primary school field, Nunachori community centre field, uttar Nalbila primary school field, Nonachori Moinul Islam Madrasa field, Mijherpara primary school field, Materbari high school field, Moheshkhali Adarsha high school field, Moheshkhali degree college field, Gorakghata high school field, Chorpara playing ground, shaplapur high school field,

Deneshpur field, Shaplapur Madrasha field. During the disaster these fields are used for taking shelters of cattle head, storage of goods and centre for relief distribution.

Cox's Bazar Sadar Upazila: Under sadar upazila a total of 20 playing grounds. They are; Cox's bazar stadium, Cox's bazar high school field, Baharchora playing field, Cox's Bazar International Cricket stadium, Jhaotola field, Tekpara primary school field, Pourashava Preparatory high school field, Hesemia Alia Madrasha field, district primary education office field, Khurulia high school field, Kurushkul high school field, Kurushkul model school field, Dakkin Kurushkul govt primary school field, PM khali high school field, Edgah playing field, Cox's bazar govt college playing field, Edgao Farid Ahmad college field, Surtia madrasa playing field, Chofaldandi high school field, Gomatoli high school field, Varuakhali high school field, Pokkhali high school field. During the disaster these fields are used for taking shelters of cattle head, storage of goods and centre for relief distribution.

Ramu Upazila: Under this Upazila there are 15 fields. They are; Konarpara field, Katajangol Hillamura field, Kawerkhop Hakin Rakimia high school, Monirjheel govt primary school, Darierdhegi primary school field, Rabeta hospital field, Joarianala H M Hakim high school, Dakkin Mithachori high school and Chendya Roson Ali high school field, Noyapara Monsur Ali Sidder Ideal school, Chakliakata playing field, Rashid Nagor Naderzzaman high school, Ultakhali govt primary school field, Ramu Khizari field, Post office field, Modal para primary school field. During the disaster these fields are used for taking shelters of cattle head, storage of goods and centre for relief distribution.

Ukhia Upazila: There are 25 playing ground under the upazila. These are Sonaichori field, Sonarpara high school field, Nidania Soikot field, Badamtoli Abtadia Madrasha field, Nidania govt primary school field, Valukia government primary school field, Palong Adarsha high school field, Moricha palong high school field, chando bonia playing field, Goraiyerdep govt primary school field, Uttar Borobil primary school field, Patabari government primary school field, Nolbila govt primary school field, Hiltos govt primary school field, Chandra Bonia playing field, Chowdhurypara primary school field, Dargao palong government primary school field, Ukhia high school field, Ukhia degree college field, Ukhia model governemtn primary school field, Rajapalong A K C high school, Ukhia Patabari playing field, Thenkhali high school field, Balukhali high school field, Palongkhali high school plyaing field. During the disaster these fields are used for taking shelters of cattle head, storage of goods and centre for relief distribution.

Teknaf Upazila: A total of 16 playing ground under Teknaf Upazila. These are namly, Teknaf pilot high school field, Teknaf Adarsha KG school field, Teknaf college field, Teknaf Union Parishad field, BGB public high school field, Nila high school field, Nila Girls high school field, Sabrang high school field, Sabrang Basir Ahmad high school, Rangikhali Madrasha field, St. Martin high school field, St. Martin union health centre field, Howkhong high school field, Howkhong union parishad field, Baharchora high school field, jahajpura primary school field. During the disaster these fields are used for taking shelters of cattle head, storage of goods and centre for relief distribution.

Graveyard

Under Cox's Bazar district there are 2222 graveyards, out of which 1967 of Muslim community and the rest 255 graveyards are belonged to other religious communities such Hindu, Buddhist and Christian. The location of those grave yard are described according to Upazila.

Kutubdia Upazila: Under 6 unions of the upazila there are 109 graveyards, among which 100 are belonged to Muslim community while, 9 are of other communities. Under Uttar Dhurong

There are 9 graveyards of Muslim and 1 graveyard for Hindu communities. Under Dakkin Dhurong union, there are 15 graveyard of Muslim and 1 is belonged to Hindu community. Under Lemshikhali union there are 28 graveyards among which 27 of Muslim and 1 for Hindu community, Under Koyerbil union 9 graveyard of Muslim while, 1 for Hindu community. Under Borgop union 10 graveyards are of Muslim community while, 4 are belonged to Hindu. Under Ali Akbar Dail Union 30 graveyards to belonged to Muslim community while only 1 is for Hindu community.

Moheshkhali Upazila: Under this upazila there are a total of 284 graveyards of Muslim community while only 25 are of Hindu and Buddhist communities. In Kutujum union 40 are Muslim. In Boro Moheshkhali union 60 graveyards are of Muslim and 1 for other community. In Choto Moheshkhali union there are 34 graveyards for Muslim and 4 of others communities. In Dhalghata union 18 graveyards are of Muslim community and 1 for Hindu community. In Hoanok union, 55 graveyards are of Muslim community while 7 are for Hindu and Buddhist communities. Under Kalarmarchara union, 37 graveyards are of Muslim community and 3 are for Hindu and Buddhist communities. Under Materbari union, 1 graveyard for Hindu while 27 are for Muslim community and under Moheshkhali pourasava there are 10 graveyards for Muslim communities while 6 graveyards are for Hindu and Buddhist communities.

Ramu Upazila: There are a total number of 326 graveyards under the upazila. Out of them 285 are belonged to Muslim communities while, 41 are of other religious communities. Under Edgor union there are 15 graveyards for Muslim and 2 for Hindu communities. Under Kawerkop union 14 of Muslim while 3 of Hindu and other communities. In Khuniapalong union, 42 graveyards of Muslim community while 2 of others communities. In Joaliornala union 34 of Muslim communities while 2 of Hindu communities. Under Kochopia union 44 graveyards of Muslim communities while 5 of other communities. In Dakkin Mithachori uion, 21 graveyards of Muslim communities while 3 are of Other communities. In Gorjonia union, 33 graveyards are of Muslim while 3 are of other communities. Under Rajarkul union there 23 graveyards of Muslim while 5 are of other communities. Under Chakmarkul union only 14 graveyards of Muslim while 2 of other communities. Under Rashidnagor union, 20 graveyards of Muslim while 1 of Hindu community and under Fatekharkul union 25 graveyards are of Muslim community while 13 graveyards are of other religious communities.

Cox's Bazar Sadar Upazila: Under the Sadar upazila there 305 graveyards of Muslim communities while 63 are of other religious communities. These graveyards are located under different unions of the upazila such as Jhelongja, Patli Machua Khali, Khurushkul, Chowfaldandi, Varuakhali, Pokkhali, Edgao, Jalalabad, Islamabad, Islampur and Cox's bazar Pourashava.

Pekua Upazila- Under 7 unions of the Upazila there 55 graveyards of Muslim and only 4 graveyards belonged to other communities. These graveyards are located in the different unions; Pekua sadar, Rajakhali, Barbakia, Mognama, Tuitong, Ujantia and Shilkhali. The graveyards of other communities are located at Mogh para, Hindu para, Pekua, Tuitong Napitpara.

Chokoria Upazila- under this upazila there are 611 graveyards of different religious communities. Among these 560 are of Muslim communities and 51 are of other communities mostly Hindu, Buddhist and Christian. These graveyards are located in the 18 unions of the upazila.

Ukhia Upazila- A total of 203 graveyards of Muslim, Hind and Buddhist communities are located under the Upazila. Among the total 175 are of Muslim, 9 are of Hindu and the rest 19 graveyards are belonged to Buddhist communities. Under Jaliapalong union, there are 30 of Muslim, while 3 are of Buddhist. Under Ratnapalong uion there are 29 of Muslim communities while 1 of Buddhist community. Under Holodiapalong union, there are 41 graveyards of Muslim communities, 2 of

Hindus and 8 for Buddhist communities. Under Rajapalong union there are 57 graveyards of Muslim communities, 5 of Hindus and 5 of Buddhist communities. And under Palongkhali union, there are 18 graveyards for Muslim, 2 of Hindus and 2 for Buddhist communities.

Among these, 203 graveyards are of Muslim communities while 34 are belonged to other religious communities living under the upazila. These graveyards are located in the unions of the Upazial such as the unions are; Howkhong, Nila, Teknaf Sadar, Sabrang, Baharchora, St. Martin and Teknaf Pourashava.

The most of the graveyards of all religious communities are built and located in high land areas so that flood water can not inundate during rainy season or during cyclone time.

Forest and Forestry

There are 1,62,942 acres of reserved forests exist in the Cox's Bazar district. Out the total of government reserve forest is 33,00.18 acres while 57,489.76 acres are developed as social forestry. The area of 19,407.81 acres are natural forest. Mostly Akasia, Bam, Bat, Agor, Segun, Mehgoni, Gorjon, Arjun and Malaria are grown plaintively. There are also individual forestation which is about 5,000 acres.

Tree- there are various types of trees are grown in the forest, most of them are Jhao, Gorjon, Arjun, Akashmoni, Koroi, Telsur, Tula, Moch, Bamboo, Akasia, Bam, Bat, Mengium, Bot, Segun, Rain tree, Mehgoni, Chatim, Jhil, Bhutkoroi, Madar, Tetul, Nim, Bain etc.

লতাগুল্ম/বোপ : জেলার বিভিন্ন বনে সাধারণত: পাথরকুচি, লজ্জাবতি, গোয়াইচ্যা লতা, আদাগুনগুনি (থানকুনি), তুলসি, বাশক, ফনিমনসা, বিন্যাঘাস, স্বর্নলতা, দুর্বা, অর্কিড (পরগাছা), বেত, পান, কেয়া, ছন প্রভৃতি লতাগুল্ম / বোপ দেখতে পাওয়া যায় ।
ফুল : জেলায়কাঠালিচাঁপা, শিউলী, বেলা, গাঁদা, জবা, কৃষ্ণচূড়া, হাসনাহেনা, জুই, গোলাপ, কামিনী, চম্পা, রজনীগন্ধা, গন্ধরাজ, পাতাবাহার প্রভৃতি উল্লেখযোগ্য ।

Communication and Transportation

The Cox's Bazar district has a well communication process and available transportation with the divisional head at Chittagong. And the internal communication system within the district is well established and having easy access.

Communication with divisional head quarter:

There are many medium and ways to communicate and transportation between Chittagong and Cox's Bazar. Transport like, bus, truck, car, jeep, micro bus are available in this road and available all the time. There is also airline service with the Chittagong city and regular flight services are available for public transportation. Different airlines such as Biman Bangladesh, United Airways, Regent Airlines, US-Bangla Airlines, AV Airlines are operating regularly. Apart from this, there is transportation scope by water ways directly from Chittagong to Cox's Bazar.

Internal communication system:

There exists a well by land or by road communication system among all the Upazilas with district head quarter except Kutubdia upazila. There are regular bus services with Ukhia, Teknaf, Chokoria, Ramu, Pekua and Moheshkhali upazilas and private bus, jeep, truck, micro bus, motorcycles are moving all the time. With Kutubdia and Moheshkhali there is direct communication and transportation system from district head quarter by boat, speed board, engine trawler. Within the upazila city there are also available transportation like jeep, car, truck, micro bus, CNG, baby taxi etc.

1.4.3 Weather and Climate:

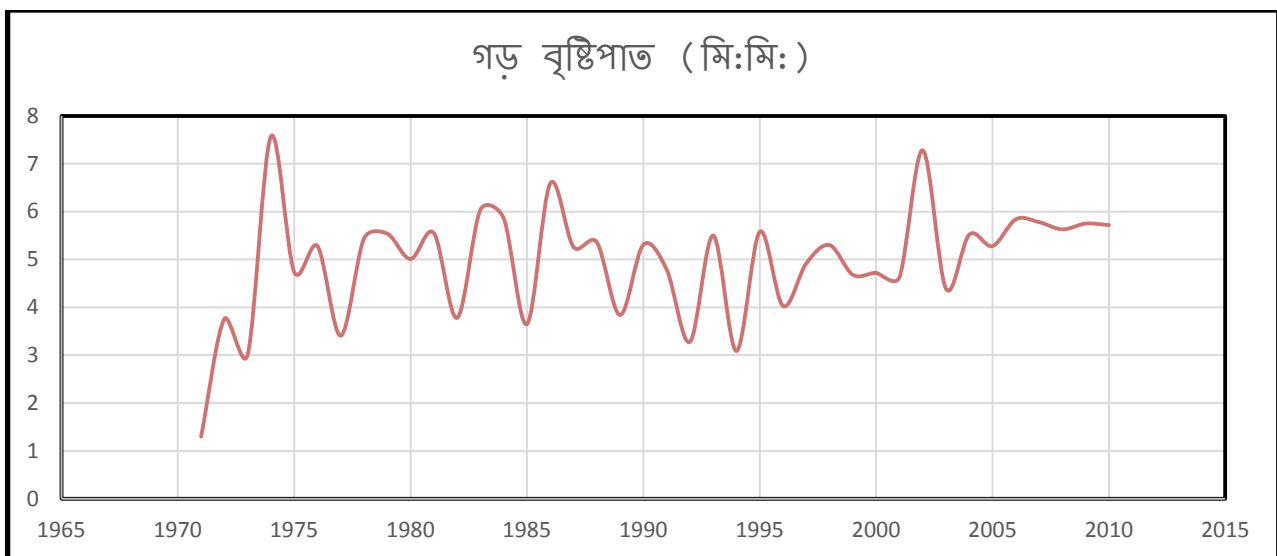

Being a coastal district, there are first category weather observation centre at Kutubdia, St. Martin and Teknaf are being operating under Cox's Bazar district weather office. Apart from this a Rudder Station near Hill Top Circuit house and an aromat branch is established at airport area. The information on weather forecast, special weather forecast, high-low tide timing and sun rise and sun set timing are monitored and disseminate.

Cautionary and announcement of signal:

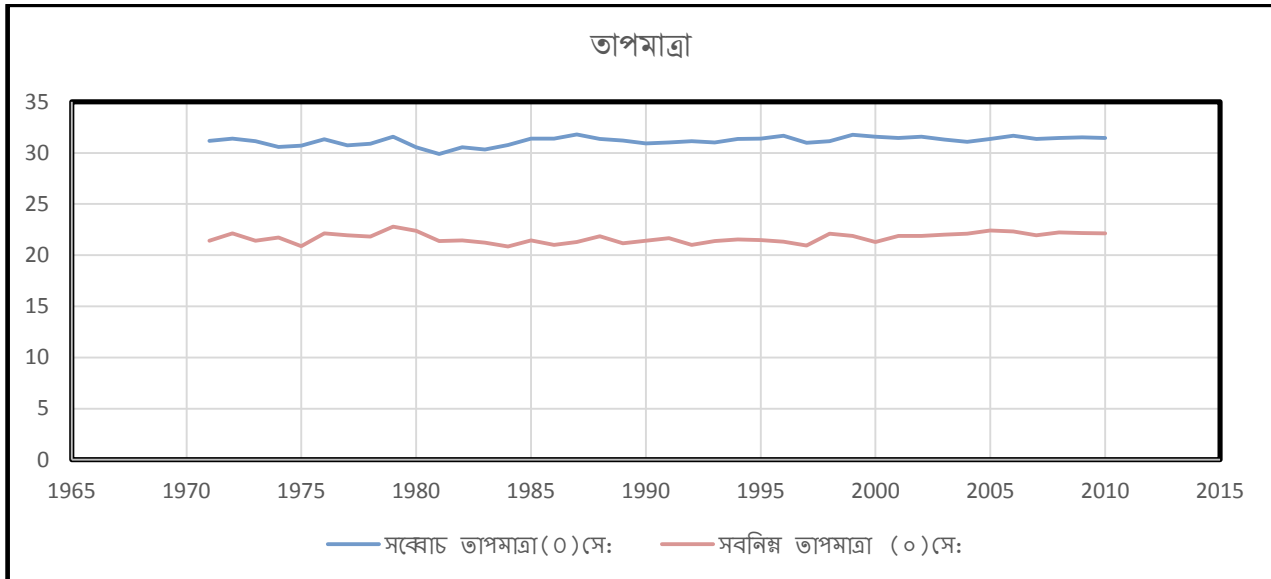

All kinds of pre-cautionary messages and signals of disaster before 24 hours, dangerous signal before 18 hours and great danger signal before 10 hours are announced and disseminated.

Information on Signal message: the signal and information specified as; the centre of point of cyclone, direction and speed, indication of possible areas under district and upazilas, nearest of high wind speed, expected highest speed of wind, expected height of tidal surge and high tide, indication of locations of district and upazilas to be affected and the level of water rise etc to be broadcasted and disseminated information.

Rainfall: The trend of rainfall of Cox's Bazar district was as usual and normal before 1991, however, radical changes have been observed in the recent years, in particularly after the year 2000. Once, the rainfall and its continuation was steady according to the seasons of the year. Interestingly, 1994 a remarkable change in rainfall has observed. In general there was no much rain during the month of January to April, and it happened during from April to June of the year. On the contrary, sometime rainfall occurs during the month of December which creates flooding. But during 10/12 years the trend of rainfall has changed and it created an effect on the life and livelihood of ordinary people.

Temperature: with the change climate, a radical change being observed in the overall temperature and with visible affect. For the Cox's bazar district the effect of climate change and its visible effects have been observed mostly after year 1991. The temperature has risen up. The local inhabitants assume that declining of forest can be one the affects of the climate change and environmental phenomena. During the recent years the temperature has gone up upto 41 Celsius with scoring heat.

Water layer of soil: The water layer of the district varies from one area to another. In fact, during the last 15 years, a huge change has been observed in the water layer of the district. For example, it requires 100-150 feet deep to get pure water whereas it required only 50 feet digging. And in the case the deep tube well requires 700-900 feet deep to get pure water in many places in which it needed not more than 500 feet earlier. In an average the water layer has down to more than 200 feet to the ground. Importantly, there are more 22 unions of the districts which need 800-1100 feet deep to get pure drinking water which is an alarming issue for the district.

1.4.4 Others;

Land and usage: the land and soil of Cox’s Bazar district has variable diversity. There are high hills, flat land, low lying area, sea beach, up-down land and uneven mountains. To meet the needs, the most people cultivate double and tri-crops a year rather than single crop. The salt cultivation abundantly cultivated in the upazilas of Kutubdia, Moheskhal, Pukua, Chokoria, Cox’s Bazar Sadar and Teknaf. In addition, the vast areas of lands are used for shrimp cultivation and betel leaf cultivation.

A chart is given indicating amount of land usage by production:

Area of total land	: 6,15,489.42 acres
Cultivable land	: 2,20,409.65 acres
Barren land	: 12,268 acres
Forest land	: 2,26,998 acres
Single crop land	: 39,568 acres
Dual crops land	: 1,71,168 acres
Tri-crops land	: 64,936 acres
Salt cultivation land	: 69,375 acres
Shrimp cultivation land	: 72,000 acres
Betel leaf cultivation land	: 7,657 acres
Tobacco cultivation land	: 7,000 acres

Land use in table:

Upazila	Area of Land (Acre)		Land Usage (Acre)		
	Cultivable	Unused	Single Crop	Double Crop	Tri-crops
Chokoria	54,891	3,112	3,603	61,750	47,654
Pekua	20,995	247	3,285	14845	2,272
Kutubdia	13,496	407	864	7,607	5,025
Moheskhali	26,264	704	6,755	18,001	1,506
Cox's bazar	25,565	225	6,422	18,278	741
Ramu	23,959	3,211	2,223	19,266	2,470
Ukhia	26,431	3,942	4,280	19,503	2,154
Teknaf	28,494	420	12,226	11,918	3,114
Total:	2,20,095	12,268	39,658	1,71,168	64,936

Agriculture and food:

Agriculture is the major profession of the people. Most people are depend and deployed their labour in the sectors of fishing, salt cultivation and agriculture. A total areas of 7,657 acres land of Moheskhali, Chokoria, Cox's Bazar Sadar, Ramu, Pekua and Ukhia upazila are involved in betel leaf cultivation while 72,000 acres of lands are utilized for shrimp cultivation under Kutubdia, Moheskhali, Pekua and Teknaf upazila, 69,375 acres of lands also involved in salt cultivation of the same upazilas. BISIC revealed that 17,63,000 metric ton salt cultivated annually by 42,842 farmers involved in this profession. Apart from this, a major portion of people are involved in agricultural sectors. And under Chokoria and Ramu upazilas about 7,000 acres lands are used for Gold Leaf tobacco cultivation. A some portion of people are involved with business of dry fish.

Main Crops of district:

Economic crop: Rice, wheat, sugarcane, salt, fish, betel leaf and betel nut.

Vegetable: Tomato, potato, brinjal, radish, beam, cauliflower, cabbage, green chilly, sweet gourd, latish finger etc.

Fruits-Water melon, mango, guava, pineapple, rose apple, wood apple, papaya, coconut, jackfruit, banana, strawberry etc.

River

There are 5 major rivers of the district flowed through the Upazila of Cox's Bazar, Ramu, Ukhia, Chokoria, Moheskhali and Teknaf. The rivers are; Matamuri, Koheli, Bakhali, Reju and Nafnadi. There are 2 channels, namely Moheskhali and Kutubdia. A brief description of the rivers given below:

Matahuri-The river originated from Lushi hill adjacent to Myanmar boarder and flowed through Ali Kadam of Bandarban district, and it continues crossing the different areas Chokoria upazila covering a length of 55 kilometre of the Upazila.

Kohelia-It starting from Moheskhali channel and go through 6 unions of the upazila including pourashava and finally reached to Bay of Bengal through Materbari and Dhalghata unions. It is 35 kilometre long.

Bakkhali- It has originated from Wading mountain of Myanmar and has flowed through Nihongchori upazila of Bandarban, entered through Gorjonia area of Ramu Upazila diverted into Bay of Bengal crossing the areas Jhelongja of Cox's Bazar Sadar Upazila.

Reju- The river has originated from Arakan boarder of Myanmar and Wading hills, it has flowed through Nihongchoriupazila of Bandarban entering into Holodiapalong of Ukhia Upazila and

Khunia union of Ramu Upazila. It has finally entered Jaliapalong of Ukhia and arrives at Bay of Bengal. It is about 20 kilometres long within Bangladesh.

Matamuhuri-The river has originated from Arakan boarder of Myanmar and Wading hills, it has flowed through Palongkhali union of Ukhia and it arrives at Bay of Bengal crossing by the side of Teknaf Upazila. It is 35 kilometre long.

Pond:

Pond has an important role in the village. Under 8 Upazilas of Cox's Bazar district there are 13,930 ponds of different size and area coverage of the ponds approximate 4,699 acres. Many people and families depend on pond water for their household use. In addition that, fishing add additional values to the economics of the district. Mostly, Telepia, Rui, Koi, Magur, Katla, Karfu, Sorpoti fishes are produced in the pond.

Canal:

Under the district there are a total of 115 canals exit in 8 Upazila of the district, these covers an areas of 7,720 acres of land. A brief description of canals are given below:

Ukhia Upazila: There are 14 canal in the Upazila which flow throughout the Upazila. Reju Canal- staring Rejur muk it crosses painnasia, sonaichoara, sonarpara, chorpara, jummapara and lamburi para. It has length of 7 kilometres. Monkhal Canal- staring from Monkhal mouth upt Nuton Chaka para. It is 8 kilometres. Sowankhal Canal- it is 8 kilometre long started from Swankhal area and stretched upto Bay of Bengal. Chepokhal Canal-It is 10 kilometre long started from Madarbonia and arrives to Chepotkhali. Inani Canal-it is 15 kilometre long started from Chenchuli to Inani. Inani Choto Canal-It is 20 kilometre long started from Chenchuli to Inani. Paglir Canal- 8 kilometre long canal started from Guarerdeep and stretches to Patabari area. Duchori Canal-the canal is 15 kilometre long started from Tuturbil to Madhurghona. Goyalmara Canal-it is 18 kilometre long starting from Tuturbil and upto Modhurghona. Balikhali Canal-the canal starting from Modhurchara and reached to the Naf river covering a length of 7 kilometre. Thiankhali Canal-It is 8 kilometre long starting from Achortoli to Naf river crossing through Tarulapara and Fashiakhali. Palongkhali Canal- This is 14 kilometre long starting from Nojumora falls into Naf river crossing different parts of Ukhia and Teknaf Upazila. Balukhali Canal: a 6 kilometre long started from Madhuchara reaches to the Naf river crossing htough BGB camp, Chowdhur para and Barua para. There are 34 canals under Chokoria, 11 canals of Teknaf, 28 Canals of Ramu and 18 canal of Pekua Upazila. There a total of 12 canals under Kutubdia Upazila. All these canals are using for irrigation during dry season.

Moor (Flat low Land):

There are 629 moors under the 8 upazilas of the district. These moors are mostly utilized for fish cultures. Under Kutubdia upazila there are 49 moor which are 13 under Uttar Dhurong-namely Kalarmachora bil, Fular para bil, Pillarpara bil, Azimuddin bil, Jamir baperpara bil, Monu sikder bil, Noyakata bil, Chordhurong bil, Moglarpara bil, Sirajpara bil, Kulartek bil, Miazirpara bil. Under Dakhin Dhurong union there are 12 bils, namely, Mosrof ali bil, Kalu bil, Ali Akbar bil, Jaliarbil, Boroitoli bil, haider Ali bil, dhurong kacha bii, Ebarpara bil, ali fakir bil, Mucharpara bil, dompara bil. Under Lemshikhali union there are 3 bils, namely, dokan ghona bil, Latyaer bil, Sirajgho bil. Under Koyerbil union there are 11 bils, namely, Gilachori bil, Molmochar bil, Dakin Molmochar bil, Omonyaghona bil, Koilashaghona bil etc.

Under Borgop Union there are 6 bils, namely, Mogdail, Mogdail pascim, Muralia, Miyerghona, Azamcolony and Dhoperghona. Under Ali Akbar Dail under thereare 4 bils, namely, Ali Akbar Dail, ali akbar dakkin, Kumirier and Rajakhali.

Ukhia Upazila: there are 16 bils under the upazila, namely, Kamrier bil, Valukia bil, Khuwa bil, uttar boro bil, patabari bil, chowdhury bil, paglier bil, koiratir bil, majkarier bil, sikderpara bil, dargah bil, rohamer bil, anjuman bil, dakin rahamer bil.

Ramu Upazila: There are 162 bils under the upazila scattered into different unions. A total of 27 bils located at Edgor, 13 bils at Khuniapalong, 47 bils at Kochopia, 30 bils at Dakkin Mithachari, 3 at Gorjonia, 2 at Rajarkul and 40 bils at Chakmarkul unions.

Chokoria: there are 217 bils under Chokoria Upazila which are located in different unions. Under Pekua upazila there are 89 bils. A total of 68 bils under Teknaf Upazila and 28 bils under Moheshkhali Upazila.

Haor:-There is no Haor in the Cox's Bazar district.

Arsenic Contamination: Yet there is no trace of any arsenic contamination in the District.

Second Chapter: Disaster, Risk and Vulnerability

2.1 History of Disaster

The most of the areas of Cox’s Bazar district surrounded by hills, rivers and being adjacent to the Bay of Bengal, natural disaster visited the district every year. Subsequently, the inhabitants of the district suffer much by the disaster. Adding this, climate change effect has speed up the frequency natural disaster like, cyclone, tidal surge, flesh flood, excesive rainfall, rising temperature, increase salinity, land slide, erosion of river banks, thunder storm, earth quake etc. and these are the major disaster for Cox’s Bazar district. As part of history of natural disaster for the region there are few events are most remarkable and historic. In the following a few histories of disaster that affected the district has been illustrated.

The most historic and destructive cyclone of 1991 severely affected the whole Cox’s Bazar district. All the 8 Upazilas of the district hit by the cyclone. Mostly St. Martin, Kutubdia, Materbari, Dhalghat, many parts of Moheskhali and Teknaf was severely affected. In an average the tidal surge by the wind speed rise from 20 to 30 feet, and 72 hours continuous water stagnated by the high tide of the sea. There were cyclone in 1994 and 1997 too which were also affected the overall resources, community life, household, cattle head, crops, infrastructure, green trees, communication system etc.

Disaster	Year	Damages	Sectors of Loses
Flood	2010	<ul style="list-style-type: none"> • Affected 29 unions under 5 Upazila • Affected areas of 225.5 kilometre • Affected family-4817 fully • Affected family-10,625 (Partial) • Population affected-11,545 persons • Dead-51 persons\ • Damage School-51 • Damage livestock-188 • Poultry bird – 5965 • Damage crop-1001 acres • Damade tube well-371 • Damage pond-38 • Damage shrimp/fish culture-4643 acres • Damage economic-50 croes 	Infrastructure, household, forest, fishery culture, betel leaf and betel nut cultivation, salt cultivation, educational institution etc.
Cyclone	2009	<ul style="list-style-type: none"> • Affected 5 Upazila • Affected family-3,080 fully • Population affected-77,500 persons • Dead-3 persons • Damage embankment-7 kilometre • Damage crop-3,716 acres • Damage salt cultivation-2552 acres 	
Cyclone	2009	<ul style="list-style-type: none"> • Affected 26 unions • Affected family- 5624 families • Population affected- 29,165 persons • Dead-2 persons • Damage road-54.4 kilometre • Damage dam-37.76 kilometre • Damage crop- 15000 acres 	

		<ul style="list-style-type: none"> • Damage salt cultivation-5000 acres 	
Cyclone	19 May 1997	<ul style="list-style-type: none"> • Affected 8 Upazila • Affected family-219956 • Population affected- 1132174 persons • Dead-34 persons • Wounded – 3516 persons • Damage School-244 • Damage livestock-3200 • Damage tree-133699 • Damage bridge-263 • Damage culvert-31 • Damage dam – 66 km • Damage shrimp/fish culture-2400 acres • Damage economic-100 croes 	
Cyclone	2007	<ul style="list-style-type: none"> • Affected 8 Upazila 43 unions • Affected area-120 km • Affected family-2004 • Population affected- 855 persons • Dead-7 persons • Damage School-11 • Damage livestock-26 • Damage dam – 29.40 km • D amageRoad -21.5 km 	
Cyclone	1994	<ul style="list-style-type: none"> • Affected 64 unions under 8 Upazila • Affected family-74229y • Population affected- 3,90,615 persons • Dead-127 persons\ • Damage schools-152 • Damage livestock-10350 • Damage crop-76114 acres • Damage road-79 km (village) • Damage govt road-90 km • Damage dam-97 km • Damage shrimp/fish culture-2530 acres • Approximage damage economic-525 croes 	
Cyclone	1991	<ul style="list-style-type: none"> • Affected 8 Upazila • Affected family- 1,96,417 • Population affected- 11,21,689 • Affacted area-1339 km • Dead-4,00,224 persons • Damage livestock-2,10,114 • Damage crop/land- 26,349 acres • Damage salt land-49,970 acres • Damage road- 1003 km • Damage dam-1099 km • Natural resource-16,29,000 • Damage school-865 • Betel leaf cultivation-11,941 acres 	

	<ul style="list-style-type: none"> • Damage bridge/culvert-135 • Damage boat-3,500 • Damage in electricity-10.96 croes • Damage in tele commu-31 croes • Damage industry-165 crors • Damage shrimp/fish culture-2530 acres • Approximate damage economic 2002.1 croes taka. 	
--	--	--

2.2. Hazard of the District:

SL No	Hazard	SL No	Priority Based
01.	Cyclone/Tidal surge	01.	Cyclone/Tidal surge
02.	Flesh Flood	02.	Bank erosion
03.	Salinity	03.	Water Logging
04.	Thunder Storm	04.	Salinity
05.	Water Logging	05.	Flesh Flood
06.	Attack of wild elephant	06.	Thunder Storm
07.	Bank erosion	07.	Earth Quake
08.	Earth Quake	08.	Attack of wild elephant

2.3. The Hazard, its present situation and future perspective:

Cyclone and tidal surge: Cyclone and tidal surge are common and most remarks hazard for the people of Cox's Bazar district. The cyclone of 29 April 1991 was the most dreadful memory for the inhabitant of the district. The breathed relatives of the day never forget the moment. The wind speed wan 220-225 km and the sea level was rised up 20-30 feet of tidal surge. People never imagined of such huge destruction and damages. During the last, several disasters in 1991, 1994, 1995, 1997, 1998 2001, 2004 and lastly in 2007 hit the coastal district and damage life, livelihood, infrastructure, , communication, properties, etc. That time, people were not much aware, so the damage was huge specially the life casualty. Now people are much aware and including government many organizations are making aware building to the people. Yet, there are many areas of the district, in particularly Kutubdia, Moheskhali and some parts of other Upazilas have lack; limited dam, damaging mangrove forest, deforestation by people, erosion of embankment etc still treat for any disaster. So, the community people, experts and relevant information come to conclusion that if cyclone like 1991 hit the district, the huge damage and destruction of dwelling house, cattle head, salt cultivation, shrimp cultivation agricultural production, educational institutions, infrastructure and communication system will be much affected.

Flesh flood-Under the Cox's Bazar, the Upazila of Teknaf, Ukhia, Cox's Bazar Sadar, Ramu, Chokria and Pekua are surrounded by the hilly areas and during monsoon or heavy rainfall occurred land slide and flesh flood. In the flesh flood of 2010 there was unexpected damage and destruction was happened in many parts of Ukhia, Teknaf, Ramu and Chokoria Upazila. It has observed during heavy rainfall the lower basin of Reju, Bakkhali, Matamuhuri and Naf rivers inundated and land slide also happened with affected the households, agricutlre etc.

So, it is expected if similar flesh flood repeated, there will be huge damage and destruction in the location of Ukhia, Ramu, Teknaf, Chokoria and some parts of Cox's Bazar will be affected. The

damage may include, houses, agriculture fields, crops, roads, betel leaf cultivation will be much affected.

Erosion of river banks-Under the district there are some point of some upazilas where the erosion are taking place. For example Ali Akbar dail, Borgop, Kaiyerbil, Lemshikhali and Uttar Dhurong of Kutudia, Dhalghata, Materbari, Kalarmarchara, Shaplapur, Kutubjum and Sonadia of Moheshkhali, low land area of Chokoria, Mognama of Pekua, Mohona of Bakkhali river low land areas of Teknaf areas most risky and vulnerable to erosion hit by tidal surge, high tide and uprising of sea level. As low lying areas, there are many areas of the district, which over flooded with 4-5 feet tidal water and erosion is occurred. If such erosion is continued, the people of coastal areas will be in risk and migration might be occurred. Apart from these, due to erosion, the salt cultivation, shrimp cultivation are severely affected.

Thunder storm- The thunder storm is one of the hazard for Cox's Bazar district. Being adjacent to the Bay of Bengal, every year during the month of April and May, due to formation of depression in the sea, sudden thunder storm and north-western wind hit many of the district. As the inhabitants of the Upazilas are poor, their houses are not strong enough and many are made of straw and bamboo, so the storm damage the houses, crops, many education institutions. It is expected for emerging trends of increasing changed global climate frequency of thunder storm will increase.

Salinity: for Cox's Bazar district the salinity is one of the hazards. The salinity found excessive during the months of December to May. During the rainy season the proportion less than other season of the year. Agriculture sectors affected during winter time and the pure drinking water scarcity is found as well due to increasing amount of salinity. There are some reasons that salinity is increasing and become hazard for the community people. The shrimp farmers bring saline water from the sea, and many areas of sea side being without proper dam or embankment the saline water entered in the river, canal and pond which contaminated the water making scarcity of pure water. Mostly the areas of Kutubdia, Moheshkhali, Pekua, Teknaf and some parts of Sadar upazilas suffer from the salinity problem. The salinity problem getting worsens day by day, and if it continues the poor people will suffer much in many ways.

Attack of wild elephant: For Cox's Bazar district the wild elephant is one of the hazards. Under the district there are forest areas under the upazila of Ramu, Chokoria, Ukhia and Teknaf in which the wild elephants are living since long. Every year, there are a considerable number of human casualties by attacking wild elephant. Moreover, sometime the huge of herd of elephant entered the locality and eaten up crops, fruits, and damage houses. So, economically, the poor farmers are losing a lot which needs care and support.

Water logging- there are many places of the district having high land and water can't stand for longer time. However, for excessive rainfall in the hilly areas, the water logging is created in the many areas. Due to this water logging the villagers face difficult for their regular movement from one place to another. Sometimes, in the low lying area the water logging occur due to high rise tidal surge, rising of sea level, lack of proper water management system etc. As a result, the communities people suffer in many ways of movement, firming, fishing, decompose of vegetable, water contamination etc. So the hazard can be prevented through making guide wall, making dam and forestation in the road side.

Earth quake- The earth quake is one of the important hazards for the whole district. Being the district is formed with a diversified social formation, and as there is hill, mountain, low land areas,

many ups and downs, sea side etc. So, considering the overall scenario the Cox's Bazar district is at risk of earth quake zone. For example during 1997, there was an earth quake on 22 July and it hit the district. During that time, 7 people died and around 200 people were wounded while many more damages occurred of households and institutions. In the same time, for the areas of Moheshkhali, Kutubdia and St. Martin, vulnerable to Tsunami if the earth quake hit.

2.4. Vulnerability and Potentiality:

Hazard	Vulnerability	Potentiality
Cyclone/tidal surge	<ul style="list-style-type: none"> ✓ Damage of infrastructure ✓ Damage of cultivable land ✓ Damage communication system ✓ Over flooded of river and canals ✓ Damage of dwelling houses ✓ Damage of crops in the field ✓ Damage of salt cultivation ✓ Demolish of mangrove forests ✓ Damage of embankment ✓ Damage of institutions ✓ Change of professional 	<ul style="list-style-type: none"> ✓ Embankment can save from huge destruction ✓ Marine drive dam protect city ✓ High land areas in very upazila ✓ Space for plantation of household ✓ Available land for new shelter construction ✓ Available space for shelter of livestock during disaster; ✓ Ready volunteer in every unions of the whole district
Flesh flood	<ul style="list-style-type: none"> ✓ Damage of household ✓ Damage of road ✓ Breakdown communication system ✓ Damage of crops ✓ Water crises ✓ Breakout waterborne disease 	<ul style="list-style-type: none"> ✓ Water do not stand in the hilly areas ✓ Available scope for repair canal ✓ Dam can be built to protect crops ✓ UP can take initiative for support the poor community people.
Thunder Storm	<ul style="list-style-type: none"> ✓ Damage of crops ✓ Damage of houses ✓ Damage of homestead garden and fruits ✓ Life casualty 	<ul style="list-style-type: none"> ✓ Available shelter in each union to take shelter. ✓ UP can take initiative for support the poor farmers.
Erosion or land slide	<ul style="list-style-type: none"> ✓ Damage of dwelling house ✓ Damage of cultivable land ✓ Damage communication system ✓ Damage of crops in the field ✓ Damage of salt cultivation ✓ Demolish of mangrove forests ✓ Damage of embankment ✓ Decrease cultivable land 	<ul style="list-style-type: none"> ✓ In Kutubdia 8 km protected with block, 20 km with embankment. ✓ Available space to build in other upazilas; ✓ Available scope to build up switch gate ✓ There are 3000 acres of tamarisk forest which protects a little bit.
Water logging	<ul style="list-style-type: none"> ✓ Damage of dwelling house ✓ Damage of cultivable land ✓ Damage communication system ✓ Damage of crops 	<ul style="list-style-type: none"> ✓ Available shelter in each union to take shelter. ✓ UP can take initiative for support the poor farmers.
Attack Wild elephant	<ul style="list-style-type: none"> ✓ Damage of crops ✓ Damage of dwelling house ✓ Life casualty 	<ul style="list-style-type: none"> ✓ Joint move can be organize ✓ Forest dept may take initiative to drive the elephant away
Salinity	<ul style="list-style-type: none"> ✓ Damage of crops ✓ Pure drinking water crises ✓ Decreasing soil fertility 	<ul style="list-style-type: none"> ✓ In many upazila have dam and switch gates to protect entering salinity easily.
Earth quake	<ul style="list-style-type: none"> ✓ Damage of dwelling house ✓ Damage communication system 	<ul style="list-style-type: none"> ✓ Available shelter in each union to take shelter.

✓ Flooding ✓ Tsunami affect	✓ UP can take initiative for aware to take necessary measure.
--------------------------------	---

2.5. Most vulnerable area:

Hazard	Most vulnerable area	Cause of Vulnerability	Vulnerable People
Cyclone	<ul style="list-style-type: none"> ✓ All unions of Kutubdia Upazila ✓ All unions of Chokoria Upazila ✓ All unions of Pekua Upazila ✓ All unions of Moheskhali Upazila ✓ Under Ramu Khuniapalong, Minijheri, Feterkarkul, Edgor, Gorjonia, Kochopia, Dearkop, Rajarkul Mithachori, Joaliernala, Rashid nagor and Chakmerkul areas ✓ Under sadar upazila-sadar, Jhelongja, Patli machura, Kurushkul, chowfaldandi, Varuakhali, Pokkhali, Edgao, Jalalabad, Islamabad and Islampur. ✓ Under Ukhia-Jaliapalong, Sonarpara, Dailpara, Lamburipara, Sonaichari, Nidania, Inani, Shafir bil, Ruppoti, Bailyakhali, Imamerdail, Sepotkhali, Maderbonia, Monkhali, Nolbila, Balukhali, Goalmara, Thainekhali and Rahmoter bil. ✓ All unions of Teknaf Upazila 	<ul style="list-style-type: none"> ✓ Lack of timely warning announcement ✓ Reluctant to move to shelter ✓ Weak infrastructure ✓ Being adjacent to the Bay of Bengal. 	✓ 4,15,954 families
Flesh flood	<ul style="list-style-type: none"> ✓ Ukhia-Palongkhali, Rajapalong, Ratnapalong, Holodiapalong and adjacent area of Jaliapalong ✓ Cox's bazar-Kurushkul, chowfaldandi, Varuakhali, Islampur, Islamabad, Edgao, PM khali and Jhelongja ✓ Moheshkhali-Hoanok, Kalarmarchara, shaplapur and choto moheshkhali. ✓ Demushia, Darbeshkata, Manikpur, chiringya, Lakhapur, Fasiakhali. ✓ Pekua-Koyerbil, Tuitong, Peukua sadar, Ujantia and Rajakhali. ✓ Teknaf-Nila, Howkhong, Baharchaora, Sabrang, and ✓ Sadar areas. 	<ul style="list-style-type: none"> ✓ Heavy rainfall ✓ Lack of irrigation system ✓ Fill up of land ✓ Unplanned infrastructure ✓ No proper plantation ✓ Erosion of road side 	✓ 3,00,000
Thunder Storm	✓ All upazilas	<ul style="list-style-type: none"> ✓ Climate change ✓ No warning signal ✓ Weak infrastructure 	✓
Water logging	<ul style="list-style-type: none"> ✓ Ukhia-Lambagona, Dailpara, Tuturbil, Goalmara, Valuakia, Timchori, Pechardeba, Telepara, Rumka, chowdhury para, painnasia and Sonaichori. ✓ Cox's Bazar sadar-Jhelongja, Varuakhali, Chowfaldandi, 	<ul style="list-style-type: none"> ✓ Heavy rainfall ✓ Hilly water stream ✓ Lack of irrigation system ✓ Lack of repairing of river, canal and chora 	✓ 7000 families

	<ul style="list-style-type: none"> ✓ Chokoria-Bodorkhali, Konakhali and Demushia ✓ Pekua-Ujatia, Mognama and Barhanua 		
Wild elephant	<ul style="list-style-type: none"> ✓ Chokoria-Dulhara, Harband ✓ Ramu-Gorjonia, Edgor ✓ Ukhaia-Rajapalong, Jaliapalong ✓ Teknaf-Howkhong 	<ul style="list-style-type: none"> ✓ Lack of elephant food ✓ Decreasing reserve forest ✓ Lack of guarding system ✓ Deforestation ✓ Lack of dwelling for elephant ✓ 	✓ 1000 families
Salinity	<ul style="list-style-type: none"> ✓ Kutubdia-All unions ✓ Chokoria-Bodorkhali, Konakhali, Kakra, Saharbil, Surajpur, Manikpur, Chirgya and Boroitoli ✓ Pekua-Rajakhali, Mognama, Tuitong, Ujantia, Silakhali ✓ Moheshkhali-Dhalghata, Materbari, Kalarmarchora, Hoanok, Boro and Choto Moheshkhali ✓ Sadar-Jhelongja, Patli Machua khali, Kurushkul, Chowfaldandi, Varuakhali and Pokhali ✓ Teknaf-All unions 	<ul style="list-style-type: none"> ✓ Broken and weak embankment ✓ Adjacent to the bay of Bengal ✓ Lack of irrigation system 	✓ 2,20,000 families
Earth quake	<ul style="list-style-type: none"> ✓ All upazilas of the district 	<ul style="list-style-type: none"> ✓ No early warning system ✓ Weak infrastructure ✓ Poor housing due to poverty 	✓ 2,25,200 families

2.6. Main heads of development planning:

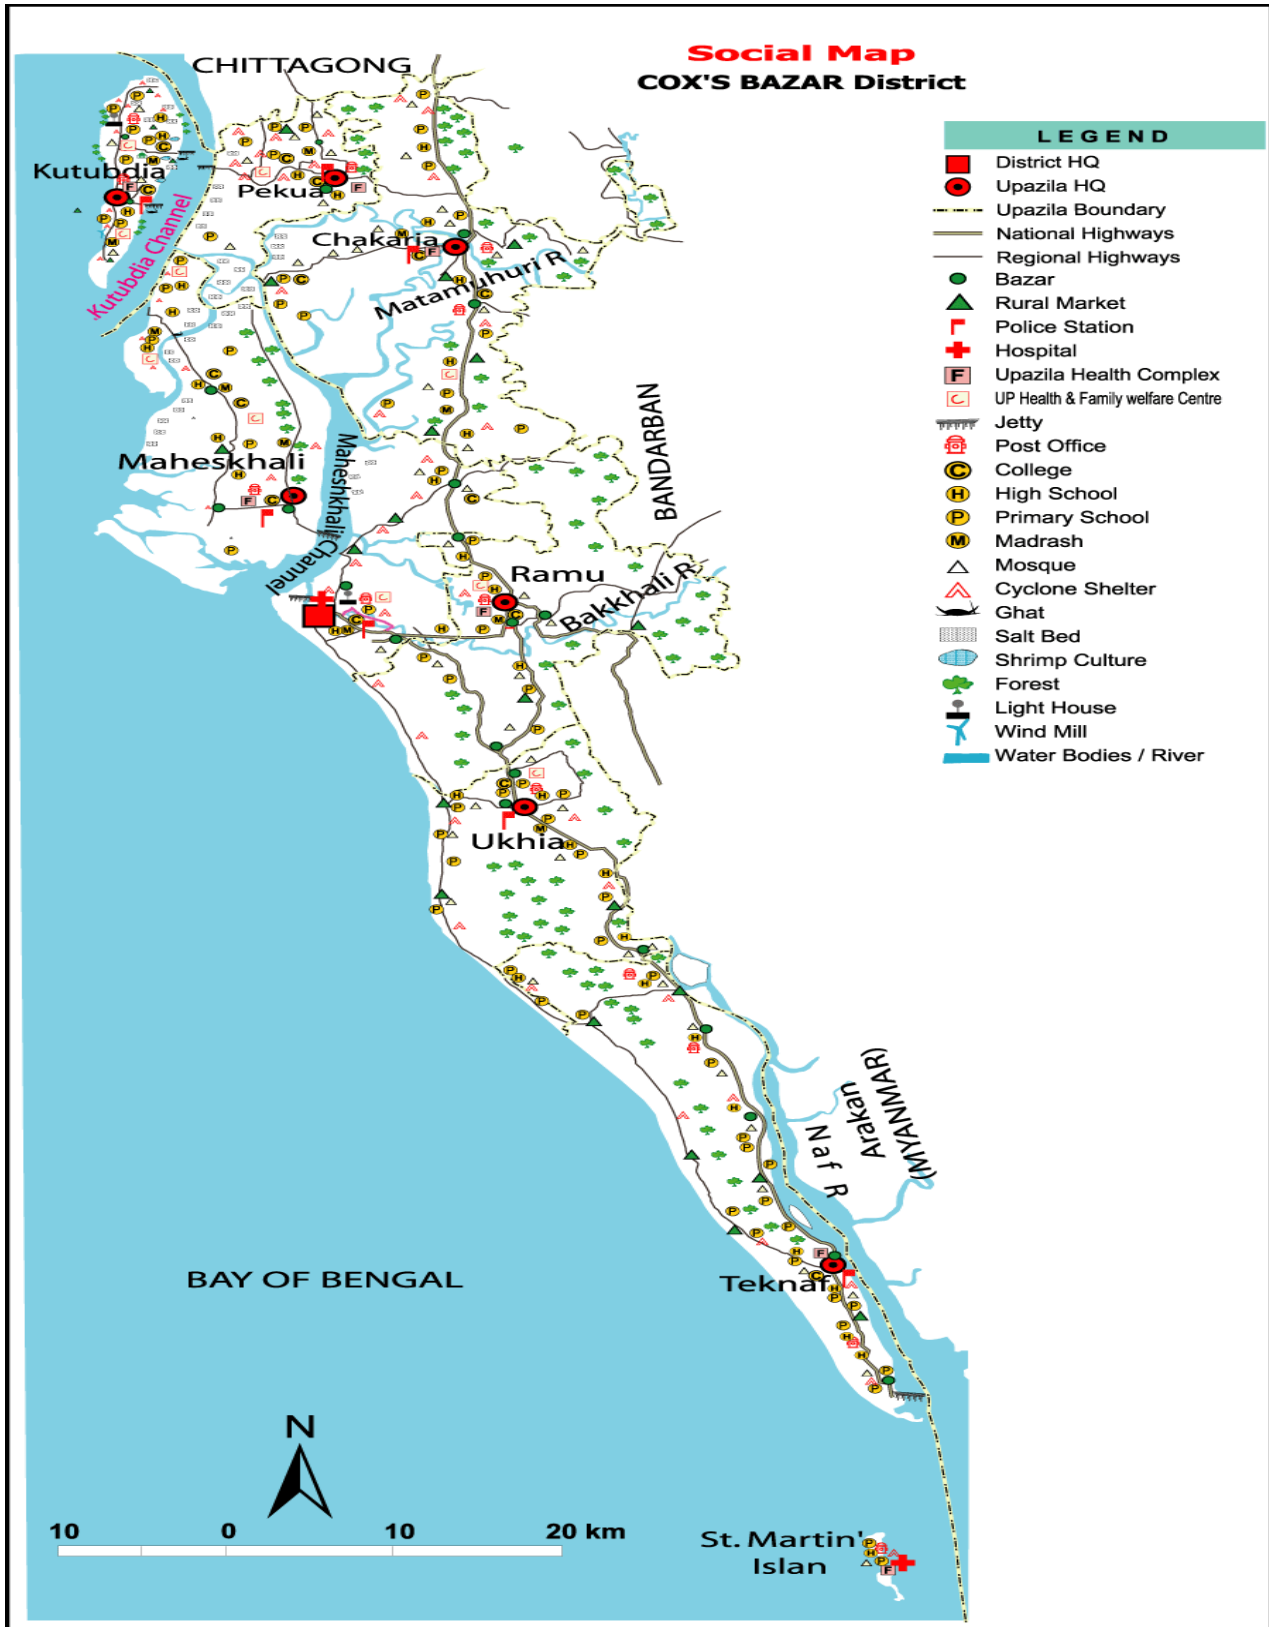

Sector	Description	Coordination to risk reduction
Agriculture	<ul style="list-style-type: none"> ▪ All the upazilas of the district produce different kinds of agriculture products including vegetables which are affected by the cyclone hit and devastation. ▪ Due to heavy rainfall of the district, 20% of crops and 10% of vegetables face damage of 39568 acres. ▪ In the whole district around 12,280 m. ton crops and grain of food produced and for the problem of water logging almost 30% production hampered in the 50,000 acres of land. ▪ By the cyclone, in an average 50% of production and crops get damage of 1,17,168 acres land. 	<ul style="list-style-type: none"> ▪ Take initiative to build switch gate in the right place. ▪ Dredging of canal and river. ▪ Construct embankment and repair the old one. ▪ Well protection of marine drive road and embankment. ▪ Development irrigation system. ▪ Alternative cultivation for saline water by the government. ▪ Digging of new canal ▪ Encourage to use of organic fertilizer ▪ Take proper take of rice before cyclone hit.
Education	<p>During 1991 cyclone almost 20% students stop their schooling while 40% infrastructures were fully damaged. So, there is the risk of students, teaching materials and school infrastructure.</p>	<ul style="list-style-type: none"> ▪ All new institution should build on high area. ▪ Create plantation ▪ Awareness building among students ▪ Initiate to build shelter at all

		<p>coastal areas.</p> <ul style="list-style-type: none"> ▪ Build strong road for schools.
Communication	<ul style="list-style-type: none"> ▪ The cyclone 1991 damaged 300 km embankment under 20 polder of water development board. So it is expected that if similar cyclone hit, 15 km marine drive road to be collapsed, more 300km dam will be demolished, 250 switch gate, 300 km road, 200 bridge, 1500 culverts and tele communication disrupted with a cost of 100 crores taka. ▪ If flood similar to 2010 repeated 3,047 km road, high ways, village will be damaged. ▪ Due to water logging 50 km roads disrupted, crops damage. 	<ul style="list-style-type: none"> ▪ Road to be constructed at high level. ▪ Construt proper guide wall ▪ Buid strong infrastureture ▪ Maintenance and repairing all road and dam. ▪ Initiate for afforestation
Health	<ul style="list-style-type: none"> ▪ During cyclone water crises arise with damage of tube well and source of water, washed out of latrine sets. And as result different kind of disease may break out. ▪ With excessive salinity water becomes contaminated and scarcity becomes acute. 	<ul style="list-style-type: none"> ▪ Increase health awareness ▪ Promote sanitation and distribute new one to poor ▪ Train up volunteer ▪ Install tube well for water ▪ Distribute medicine during cyclone.
Environment	<ul style="list-style-type: none"> ▪ Due to natural disaster the environment become the first affected sector. In different way the whole environment is affected. Specially the cyclone, flood, water logging, salinity, earth quake create enormous damage to the environment. During 1994 cyclone almost 40% of tree fully damaged. So environment is at risk to disaster. 	<ul style="list-style-type: none"> ▪ Create Tamarisk and mangrove forest, ▪ Promote widely environmental awareness. ▪ Tree plantation ▪ Develop homestead plantation ▪ Salinity suitable riec innovation ▪ Stop the illegal wood cutting.
Fishing Industry	<ul style="list-style-type: none"> ▪ Cyclone of 91 is hit the district, it is estimated that all shrimp cultivation will be damaged. ▪ 200 cores taka assets of 29 hatcheries will be affected. 	<ul style="list-style-type: none"> ▪ Necessary support to fisherman. ▪ Strong protection of shrimp cultivation ▪ Construct new embankment and repair the old ones. ▪ Awareness building ▪ 2/3 lyer fish cultivation ▪ Security to the hetcheries
Household	<ul style="list-style-type: none"> ▪ During 1991 cyclone 5,000 households were fully damaged. ▪ Due to thunder storm, yearly 20 dwelling houses are damaged. ▪ Due to tidal surge and excessive rainfall, 10% houses damaged. 	<ul style="list-style-type: none"> ▪ Strong housing for poor families. ▪ To encourage to build house in the high land areas. ▪ Create strong embankment and dam ▪ To build cyclone shelter centre in the district.

Livelihood	<ul style="list-style-type: none"> ▪ In 1991 cyclone, 5000 fishermen, 20,000 farmers, 10,000 small traders and 9,000 agriculture labour affected by the damages. ▪ Due to salinity 5,000 farmers and 4,000 fishermen are affected every year. ▪ Due to water logging, 2,000 fishermen, 3,000 farmers directly affected annually. 	<ul style="list-style-type: none"> ▪ Organize alternative livelihood for poor people. ▪ Provide skill training and credit support. ▪ Social forestation ▪ Government support for livelihood promotion.
------------	---	--

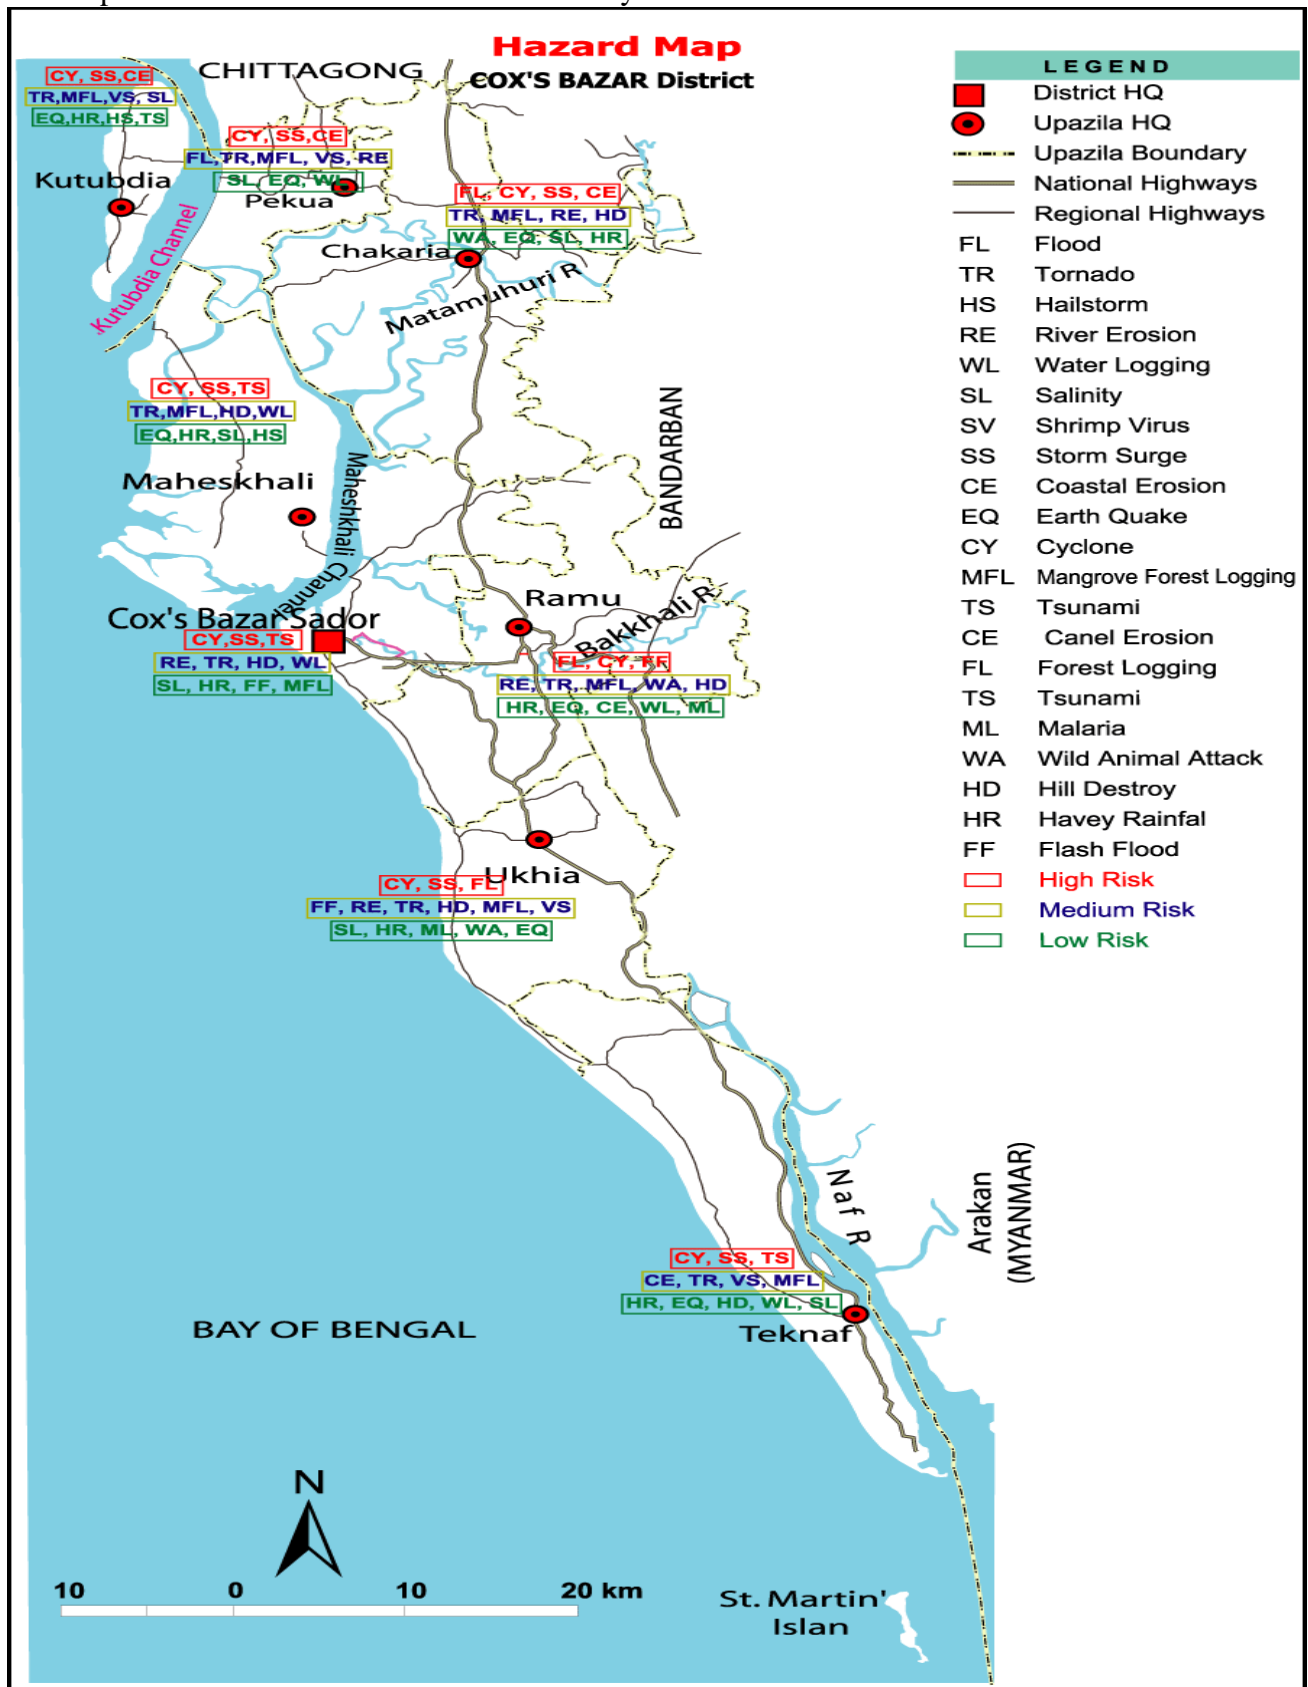

2.7. Social Map

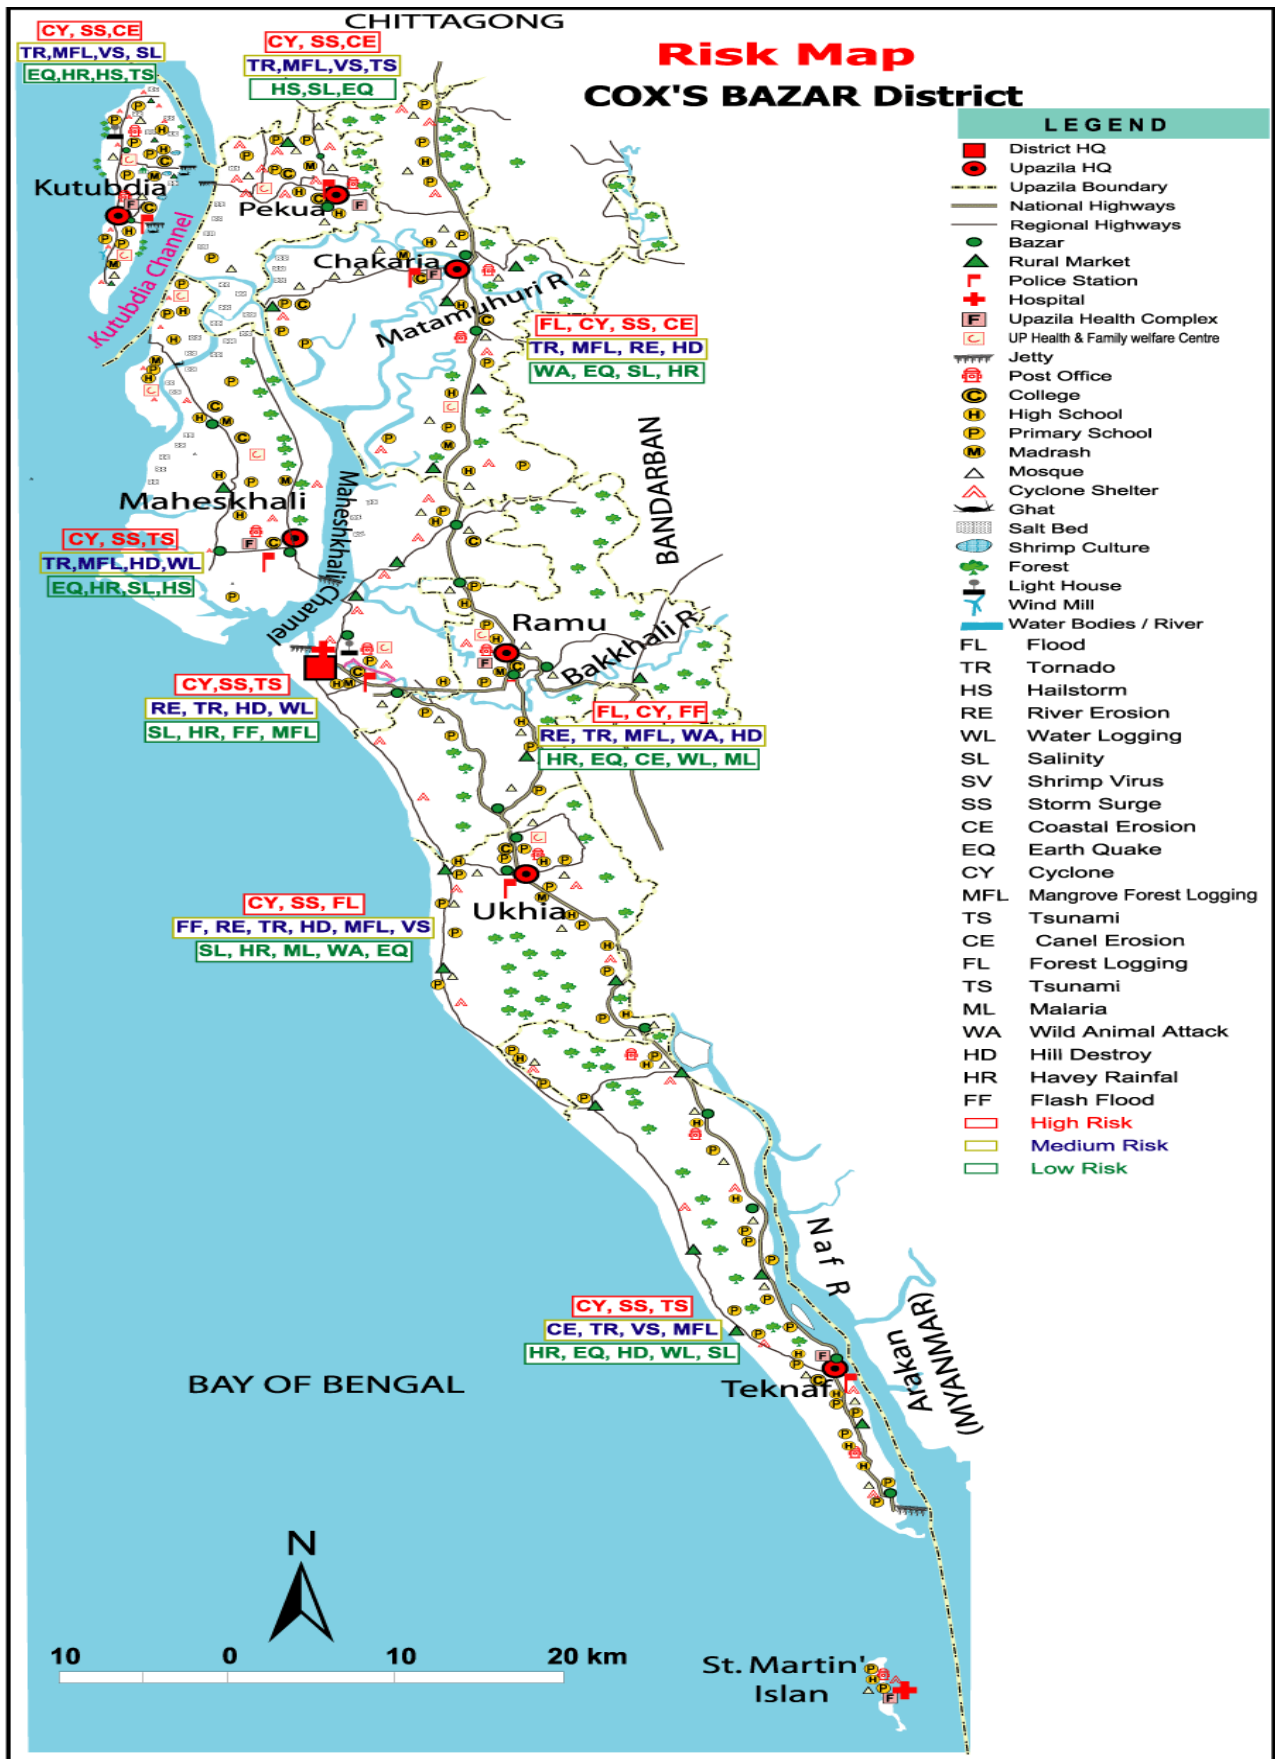

The social situation of the district has been shown at a glance with indication to social institution, service oriented organization, shelter, health and educational institution, resources etc.

2.8. Hazard and Risk Map

The map has indicated hazard and risk created by different disaster of the district:

2.9. Hazard Calendar

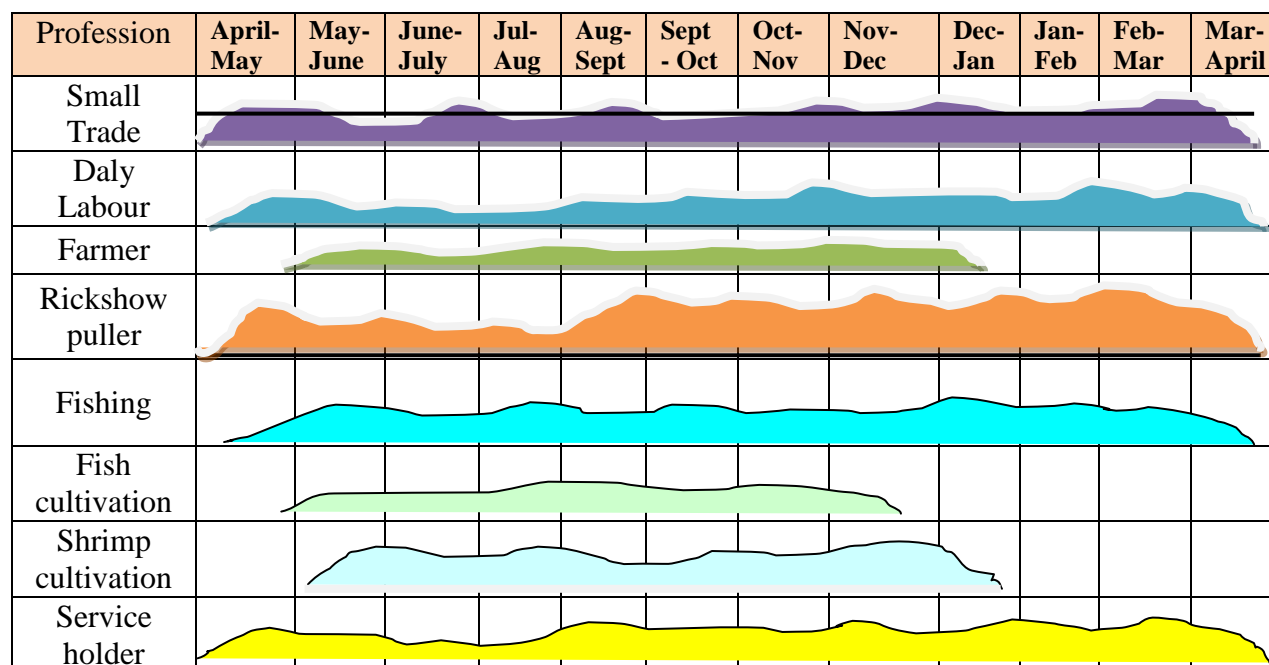

In the calendar of hazard it has demarcated the frequency and visitation of different hazard of the year round:

Hazard	April -May	May-June	June-July	Jul-Aug	Aug-Sept	Sept - Oct	Oct-Nov	Nov-Dec	Dec-Jan	Jan-Feb	Feb-Mar	Mar-April
Cyclone	[Green bar]					[Green bar]						
Flesh flood		[Blue bar]										
Thunder storm	[Green bar]											
Erosion/ land slide		[Purple bar]										
Water logging		[Light blue bar]										
Wild elephant		[Orange bar]						[Orange bar]				
Earth quake		[Light blue bar]										
Salinity			[Green bar]									

Analysis of Calendar:

- ❖ **Cyclone**-Cox's Bazar is located at the side of Bay of Bengal. Being geographical influenced cyclone affect very frequently. The cyclone hits during month of April to June and September to November of the year. During these period, there are agriculture production, fish production and people are got involved productive sectors. As such the inhabitants suffer much by the cyclone.
- ❖ **Flesh flood**- there are many small canal and stream in the district. So, during the rainy season and with heavy rainfall, the small canal, stream over flowed and created flesh flood. Flesh flood damage house, crops, road and other assets of society. The flesh flood normally occurs during the months of May to September.
- ❖ **Thunder storm**- due to thunder storm house, betel leaf cultivation, and other crops are much affected. This thunder storms are occurred during months of April to June of the year.
- ❖ **Erosion or land slide**-For the district land slide or erosion occurs during month May to November. Land slide created during heavy rains at rainy season and land erosion occurs at the adjacent of river and sea area which are affected by water flow and high tide.
- ❖ **Water logging**-as influence of climate in recent, the water logging occur due to rising sea water and high tide with tidal surge in the sea. The water logging is mostly occurs during the month of May to September.
- ❖ **Wild elephant**-the attack of wild elephant hazard for many community people of Cox's Bazar district. During the month of May-September and November-February the elephant herd attacks the community people, crops, fruits garden etc.
- ❖ **Earth quake**-There is no certain time or period of earth quake or tsunami, however, any time in the year happen and may damage life, property and assets of the locality.
- ❖ **Salinity**- During the month of June to September of the year, the salinity problem arise in the different parts of coastal areas specially in Kutubdia, Moheshkhali, Teknaf, Cox's Bazar Sadar.

8.	Attack wild elephant	▪		▪	▪								▪		
----	----------------------	---	--	---	---	--	--	--	--	--	--	--	---	--	--

- ✓ Cyclone and tidal surge: Cyclone and tidal surge are common and most remarks hazard for the people of Cox’s Bazar district. The cyclone of 29 April 1991 was the most dreadful memory for the inhabitant of the district. The breathed relatives of the day never forget the moment. The wind speed wan 220-225 km and the sea level was rised up 20-30 feet of tidal surge. People never imagined of such huge destruction and damages. During the last, several disasters in 1991, 1994, 1995, 1997, 1998 2001, 2004 and lastly in 2007 hit the coastal district and damage life, livelihood, infrastructure, , communication, properties, etc. That time, people were not much aware, so the damage was huge specially the life casualty. Now people are much aware and including government many organizations are making aware building to the people. Yet, there are many areas of the district, in particularly Kutubdia, Moheshkhali and some parts of other Upazilas have lack; limited dam, damaging mangrove forest, deforestation by people, erosion of embankment etc still treat for any disaster. So, the community people, experts and relevant information come to conclusion that if cyclone like 1991 hit the district, the huge damage and destruction of dwelling house, cattle head, salt cultivation, shrimp cultivation agricultural production, educational institutions, infrastructure and communication system will be much affected.
- ✓ Flesh flood-Under the Cox’s Bazar, the Upazila of Teknaf, Ukhia, Cox’s Bazar Sadar, Ramu, Chokria and Pekua are surrounded by the hilly areas and during monsoon or heavy rainfall occurred land slide and flesh flood. In the flesh flood of 2010 there was unexpected damage and destruction was happened in many parts of Ukhia, Teknaf, Ramu and Chokoria Upazila. It has observed during heavy rainfall the lower basin of Reju, Bakkhali, Matamuhuri and Naf rivers inundated and land slide also happened with affected the households, agricutlre etc. So, it is expected if similar flesh flood repeated, there will be huge damage and destruction in the location of Ukhia, Ramu, Teknaf, Chokoria and some parts of Cox’s Bazar will be affected. The damage may include, houses, agriculture fields, crops, roads, betel leaf cultivation will be much affected.
- ✓ Erosion of river banks-Under the district there are some point of some upazilas where the erosion are taking place. For example Ali Akbar dail, Borgop, Kaiyerbil, Lemshikhali and Uttar Dhurong of Kutudia, Dhalghata, Materbari, Kalarmarchara, Shaplapur, Kutubjum and Sonadia of Moheshkhali, low land area of Chokoria, Mognama of Pekua, Mohona of Bakkhali river low land areas of Teknaf areas most risky and vulnerable to erosion hit by tidal surge, high tide and uprising of sea level. As low lying areas, there are many areas of the district, which over flooded with 4-5 feet tidal water and erosion is occurred. If such erosion is continued, the people of coastal areas will be in risk and migration might be occurred. Apart from these, due to erosion, the salt cultivation, shrimp cultivation are severely affected.
- ✓ Thunder storm- The thunder storm is one of the hazard for Cox’s Bazar district. Being adjacent to the Bay of Bengal, every year during the month of April and May, due to formation of depression in the sea, sudden thunder storm and north-western wind hit many of the district. As the inhabitants of the Upazilas are poor, their houses are not strong enough and many are made of straw and bamboo, so the storm damage the houses, crops, many education institutions. It is expected for emerging trends of increasing changed global climate frequency of thunder storm will increase.
- ✓ **Salinity:** for Cox’s Bazar district the salinity is one of the hazards. The salinity found excessive during the months of December to May. During the rainy season the proportion less than other season of the year. Agriculture sectors affected during winter time and the pure drinking water scarcity is found as well due to increasing amount of salinity. There are some reasons that salinity is increasing and become hazard for the community people. The shrimp farmers bring saline water from the sea, and many areas of sea side being without proper dam or embankment the saline water entered in the river, canal and pond which contaminated the water making scarcity of pure water. Mostly the areas of Kutubdia, Moheshkhali, Pekua, Teknaf and some

parts of Sadar upazilas suffer from the salinity problem. The salinity problem getting worsens day by day, and if it continues the poor people will suffer much in many ways.

- ✓ Attack of wild elephant: For Cox’s Bazar district the wild elephant is one of the hazards. Under the district there are forest areas under the upazila of Ramu, Chokoria, Ukhia and Teknaf in which the wild elephants are living since long. Every year, there are a considerable number of human casualties by attacking wild elephant. Moreover, sometime the huge of herd of elephant entered the locality and eaten up crops, fruits, and damage houses. So, economically, the poor farmers are losing a lot which needs care and support.
- ✓ **Water logging-** there are many places of the district having high land and water can’t stand for longer time. However, for excessive rainfall in the hilly areas, the water logging is created in the many areas. Due to this water logging the villagers face difficult for their regular movement from one place to another. Sometimes, in the low lying area the water logging occur due to high rise tidal surge, rising of sea level, lack of proper water management system etc. As a result, the communities people suffer in many ways of movement, farming, fishing, decompose of vegetable, water contamination etc. So the hazard can be prevented through making guide wall, making dam and forestation in the road side.

Vulnerability of sector/institution/Infrastructure:

sector/institution/ Infrastructure	Why & how vulnerable	How reduce vulnerability
Environment	The unplanned demolish of forest, hills, fishing, use of fertilizer, water pump vulnerable to environment, because they produce heat, excessive rain, flood, land slide, disease etc. which are severely affective for human life.	Mass awareness building, ensure implantation law and justice, exemplary punishment, plantation, forestation etc.
Road and communication	The landlord and business people made unplanned dam, hatchery, shrimp culture etc. which creates collapse of road, blockade, sliding	Ensure justice and public awareness with involvement of government and political leaders.
Crops	Crops are affected and damaged by cyclone, flood, water logging, salinity, tidal surge, land slide, attack by wild elephant. There are sea side, forest, many rivers and channel, rising sea water. So, crops are affected by the hazards of the district.	Agriculture department introduce new types of rice. Protective measure should take by government to protect sea water.
Scarcity of water	During the cyclone, flood, thunder storm or earth quake the sources of pure drinking water damage or uprooted, water scarcity suffer.	Install more deep tube well with strong foundation so that they can easily affected by cyclone, flood or earth quake.
Health	Health is one the main hazard for any disaster. During disaster the people move from one place to another and the volunteers are become busy to recover the affected people. Yet, those seriously woods suffer without treatment. Specially the pregnant mother, children are suffered much. During flood and cyclone, different kinds of diseases are brook out.	Apart from government health department, different social institutions, NGO, INGO joint preparation should be taken and the team should be well equipped.
Education	During disaster it may be cyclone, flood, earth quake, thunder storm, the education sector is severely affected. Broken of houses, losses of teaching materials, students are suffered	Mass awareness program should be taken up, besides government, NGO and private organization should support the school activities, teaching materials, student support etc.
Fishery	This sector has a inevitable on economic advancement of the areas. And it has plaintive resources of fishery for the district. However, due to disaster like cyclone, tornado, flood, water logging, land sliding/erosion the fish industry is affected much.	To construction embankment, restriction for catching during breeding, plantation sorroung fish cultivation.

2.13. Climate change its possible effect

- ✚ **Agriculture sector:** climate is one of the burning issue now-a-days. Climate changes have aggregated various disasters; hazard and consequently the vulnerability are increasing day by day. As result climate change, there are increasing number of cyclone, tidal surge, bank erosion, flesh flood, excessive rainfall, flood, thunder storm etc. and all the disasters and hazards mentioned to the above are vulnerable to the community life. The thousands of acres of crops may wash away under the upazilas of Kutubdia, Moheskhali, Ramu, Chokoria, Pejkua, Teknaf and Ukhia by the cyclone, tidal surge and flooding. In the same time, due to heavy rainfall 20% vegetable will wash out of about 12,280 acres. With the tidal surge of the sea, every year 15% of agriculture field is damaged out of 12,280 acres. While for water logging in the areas of Kutubdia, Moheskhali, Teknaf and Pekua a total f 30,000 acres of crops will be damaged partially.
- ✚ **Fisheries sector:** climate change affects the fisheres sector too. Infect this sector has a important role on economic advancement of the areas. And it has plaintive resources of fishery for the district. However, due to disaster like cyclone, tornado, flood, water logging, land sliding/erosion the fish industry is affected much. It is estimated that if cyclone like 1991 repeated at 29 hatcheris with economical lose of 200 crors taka, similarly, with the effect of thunder storm at least 10% fishes will damage in rivers, canal and sea.
- ✚ **Plants and nature-**due to climate change the plants and natural suffer a lot. The trend of declining the number of tree has the directo impact of climate change. The excessive heat and rising temperature wroning the environment imbalance which orinated thunder storm, cyclone, tornado etc. And the natural disaster damages the trees and natures.
- ✚ **Health:** climate change has a major impact on overall health issues of the district. Increasing heat, rising temperature, untine rain, heavy rainfall all are results of climate change, and consequently the communities suffer from different kinds of diseases, During disaster the people move from one place to another and the volunteers are become busy to recover the affected people. Yet, those seriously woods suffer without treatment. Specially the pregnant mother, children are suffered much. During flood and cyclone, different kinds of diseases are brook out.
- ✚ **Livelihood Sector-**the disaster and hazard like; excessive rainfall, flesh flood, tidal surge and along with cyclone all these are ultimate consequences of climate change and global warming. And consequencs of hazard and disasters direct make on on agriculture, fishing, education, infrastructure, shrimp and salt cultivation. All these sectors of development involve the community people and all livelihood professional stakeholders. Finally, the climate change is ultimately affecting the livelihood of all sectors of people in the district of Cox's Bazar. Alarming point is that in search of livelihood the poor people move from area to another, and sometime they migrated to other district.
- ✚ **Infrastructure-** all kinds of disaster and hazard like; excessive rainfall, flesh flood, tidal surge and along with cyclone all these are consequences of climate change and the damages in infrastructure sector become very proven with the previous experience of the Cox's Bazar district. For better understanding some figures and data can be placed. With the experiences of 1991, it was a huge destruction which was much severe in history of Cox's Bazar including the human casualty of 4,09,224 persons. So, the similar assessment and assumption shows that if similar of disaster hit the district, then 300 km embankment will be affected, 15 km marine drive road may collapse, 150 switch gates, 200 bridges, 1,500 culverts, 3,047 km muddy road, 859 km semi pucca and 100 pucca road will be affected severely. At least 100 crores amounting lose may happen in the electric communication.
- ✚ **Tourism:** climate change also affects the tourism in Cox's bazar. During disaster time, very less tourists move to Cox's Bazar. Yet, if the communication system, different tourist spots, international communication are well organized, then the tendency of tourist must increase. So, climate change also has a ultimate influences on tourism of Cox's Bazar

Third Chapter-Disaster Risk Reduction

3.1. Indentify Causes of Risk

Risk	Cause		
	Immediate	Secondary	Ultimate
<p>Cyclone and tidal surge This is the common and most remarkable hazard for the people of Cox's Bazar district. The cyclone of 29 April 1991 was the most dreadful memory for the inhabitant of the district. The breathed relatives of the day never forget the moment. The wind speed wan 220-225 km and the sea level was rised up 20-30 feet of tidal surge. People never imagined of such huge destruction and damages. During the last, several disasters in 1991, 1994, 1995, 1997, 1998 2001, 2004 and lastly in 2007 hit the coastal district and damage life, livelihood, infrastructure, , communication, properties, etc. That time, people were not much aware, so the damage was huge specially the life casualty. Now people are much aware and including government many organizations are making aware building to the people. Yet, there are many areas of the district, in particularly Kutubdia, Moheskhali and some parts of other Upazilas have lack; limited dam, damaging mangrove forest, deforestation by people, erosion of embankment etc still treat for any disaster. So, the community people, experts and relevant information come to conclusion that if cyclone like 1991 hit the district, the huge damage and destruction of dwelling house, cattle head, salt cultivation, shrimp cultivation agricultural production, educational institutions, infrastructure and communication system will be much affected.</p>	<ul style="list-style-type: none"> • Heat wave due to climate change. • Due to lack of proper and in time early warning. • Due to lack of understanding about signal by the people. • Female unwilling to move shelter for not being separate arrangement. • Due to lack of separate sanitation arrangement for women. • 	<ul style="list-style-type: none"> • Due to lack of awareness among the community people. • Weak structure of infrastructures and housing of ordinary people 	<ul style="list-style-type: none"> • Due to lack of long term planning • Limited mangrove forest besides sea side • Due to lack of embankment in the sea side • Due to lack of enough shelter. • Due to lack of irrigation syetem • For unplanned development of tourism and hatchery industries. .
<p>Flesh flood- Under the Cox's Bazar, the Upazila of Teknaf, Ukhia, Cox's Bazar Sadar, Ramu, Chokria and Pekua are surrounded by the</p>	<ul style="list-style-type: none"> • Excessive rainfall • Deforestation 	<ul style="list-style-type: none"> • Declining of forest resources including reserve forest 	<ul style="list-style-type: none"> • Lack of long term planning of water extraction system

<p>hilly areas and during monsoon or heavy rainfall occurred land slide and flesh flood. In the flesh flood of 2010 there was unexpected damage and destruction was happened in many parts of Ukhia, Teknaf, Ramu and Chokoria Upazila. It has observed during heavy rainfall the lower basin of Reju, Bakkhali, Matamuhuri and Naf rivers inundated and land slide also happened with affected the households, agricultre etc. So, it is expected if similar flesh flood repeated, there will be huge damage and destruction in the location of Ukhia, Ramu, Teknaf, Chokoria and some parts of Cox’s Bazar will be affected. The damage may include, houses, agriculture fields, crops, roads, betel leaf cultivation will be much affected</p>	<ul style="list-style-type: none"> • Unplanned development of housing and cultivation. • Climate change • Unplanned land grabbing of road side and construct infrastructure. 	<ul style="list-style-type: none"> • Fill up small canal, pond, water basin etc. • Lack of enough road side plantations. • Lack of water extraction system. • Unplanned construction of village road. 	<ul style="list-style-type: none"> • Lack of planning in urbanization and extension of housing program in the villages.
<p>Land sliding/erosion: Under the district there are some points of some upazilas where the erosion are taking place. For example Ali Akbar dail, Borgop, Kaiyerbil, Lemshikhali and Uttar Dhurong of Kutudia, Dhalghata, Materbari, Kalarmarchara, Shaplapur, Kutubjum and Sonadia of Moheshkhali, low land area of Chokoria, Mognama of Pekua, Mohona of Bakkhali river low land areas of Teknaf areas most risky and vulnerable to erosion hit by tidal surge, high tide and uprising of sea level. As low lying areas, there are many areas of the district, which over flooded with 4-5 feet tidal water and erosion is occurred. If such erosion is continued, the people of coastal areas will be in risk and migration might be occurred. Apart from these, due to erosion, the salt cultivation, shrimp cultivation are severely affected</p>	<ul style="list-style-type: none"> • Unplanned housing in the government land. • Establishment of new housing (locality). • Illegal Hill cutting • Agriculture cultivation at the very low lying areas. • Building house at agriculture land. 	<ul style="list-style-type: none"> • Illegal grabbing of government land. • Limited embankment • Rise of water level. 	<ul style="list-style-type: none"> • Lack of long term plan by the government. • Lack of project in this sector
<p>Thunder storm- The thunder storm is one of the hazard for Cox’s Bazar district. Being adjacent to the Bay of Bengal, every year during the month of April and May, due to formation of depression in the sea, sudden thunder storm and north-western wind hit many of the district. As the inhabitants of the Upazilas are poor, their houses are not strong enough and many are made of straw and bamboo, so the storm damage the houses, crops, many education</p>	<ul style="list-style-type: none"> • Being closet to the Bay of Bengal and sudden created north-west wind. • Due to low infrastructure and housing system 	<ul style="list-style-type: none"> • Climate change • Reluctant to move the shelter. • People are being poor • Low proportionate of forest 	<ul style="list-style-type: none"> • Global warming. • Damage of national economy. • Increase poverty

<p>institutions. It is expected for emerging trends of increasing changed global climate frequency of thunder storm will increase</p>			
<p>Salinity: For Cox’s Bazar district the salinity is one of the hazards. The salinity found excessive during the months of December to May. During the rainy season the proportion less than other season of the year. Agriculture sectors affected during winter time and the pure drinking water scarcity is found as well due to increasing amount of salinity. There are some reasons that salinity is increasing and become hazard for the community people. The shrimp farmers bring saline water from the sea, and many areas of sea side being without proper dam or embankment the saline water entered in the river, canal and pond which contaminated the water making scarcity of pure water. Mostly the areas of Kutubdia, Moheshkhali, Pekua, Teknaf and some parts of Sadar upazilas suffer from the salinity problem. The salinity problem getting worsens day by day, and if it continues the poor people will suffer much in many ways.</p>	<ul style="list-style-type: none"> • Being close to the sea area. • Due to lack of embankment. • Due to logging the saline water 	<ul style="list-style-type: none"> • Due to lack of culvert/switch gate • Due to lack of awareness among the salt cultivator. • Due to lack of saline water tolerable. 	<ul style="list-style-type: none"> • Due to lack of awareness among the community people • In absence of government initiative.
<p>Water logging- there are many places of the district having high land and water can’t stand for longer time. However, for excessive rainfall in the hilly areas, the water logging is created in the many areas. Due to this water logging the villagers face difficult for their regular movement from one place to another. Sometimes, in the low lying area the water logging occur due to high rise tidal surge, rising of sea level, lack of proper water management system etc. As a result, the communities people suffer in many ways of movement, farming, fishing, decompose of vegetable, water contamination etc. So the hazard can be prevented through making guide wall, making dam and forestation in the road side</p>	<ul style="list-style-type: none"> • Excessive rainfall • Due to lack irrigation system. • Due to establish of unplanned shrimp hatchery • Filling of canal, rivers etc. 	<ul style="list-style-type: none"> • Due to lack of culvert/switch gate • Due to lack of awareness among the hatchery owner. • Due to lack of saline water tolerable. • Being most of agriculture lands are at low lying areas. 	<ul style="list-style-type: none"> • Due to lack of initiative related department of government including the water development and agriculture department.
<p>Attack of wild elephant: For Cox’s Bazar district the wild elephant is one of the hazards. Under the district there are forest areas under the upazila of Ramu, Chokoria, Ukhia and Teknaf in which the wild elephants</p>	<ul style="list-style-type: none"> • There is no early warning system • Unprotected 	<ul style="list-style-type: none"> • Due to lack of specific wild life preservation areas 	<ul style="list-style-type: none"> • Decreasing reserve forest. • Due to lack of bio-

are living since long. Every year, there are a considerable number of human casualties by attacking wild elephant. Moreover, sometime the huge of herd of elephant entered the locality and eaten up crops, fruits, and damage houses. So, economically, the poor farmers are losing a lot which needs care and support	localities or agriculture field. <ul style="list-style-type: none"> • Due to short of their food. • Low housing system 	<ul style="list-style-type: none"> • Limited forest areas • Due to lack projection measures. 	<div style="text-align: right;">diversity</div> <ul style="list-style-type: none"> • Lack of government plan to preserve the wild life. • Forest department has no special initiative.
Earth quake- The earth quake is one of the important hazards for the whole district. Being the district is formed with a diversified social formation, and as there is hill, mountain, low land areas, many ups and downs, sea side etc. So, considering the overall scenario the Cox's Bazar district is at risk of earth quake zone. For example during 1997, there was an earth quake on 22 July and it hit the district. During that time, 7 people died and around 200 people were wounded while many more damages occurred of households and institutions. In the same time, for the areas of Moheshkhali, Kutubdia and St. Martin, vulnerable to Tsunami if the earth quake hit	<ul style="list-style-type: none"> • There is no early warning system. • Limited time to move the shelter centre. 	<ul style="list-style-type: none"> • Geographical location that vulnerable for earth quake (Beneath of Ganges basin). 	<ul style="list-style-type: none"> • For poor infrastructure and low cost housing. • For lack of awareness of the community people. • No specific plan by government of preventive measure, not even by NGO.

3.2. Identify risk reduction ways

Risk	Cause		
	Immediate	Secondary	Ultimate
Cyclone and tidal surge This is the common and most remarkable hazard for the people of Cox's Bazar district. The cyclone of 29 April 1991 was the most dreadful memory for the inhabitant of the district. The breathed relatives of the day never forget the moment. The wind speed wan 220-225 km and the sea level was rised up 20-30 feet of tidal surge. People never imagined	<ul style="list-style-type: none"> • Heat wave due to climate change. • Mass awareness building. • Build more shelter with separate facilities for women 	<ul style="list-style-type: none"> • Community awareness. • Create mangrove forest. • Building strong structure. • Develop a practice of listening news of weather. 	<ul style="list-style-type: none"> • Government to plan for construct new shelter • Establish community radio. • Develop embankment.

<p>of such huge destruction and damages. During the last, several disasters in 1991, 1994, 1995, 1997, 1998 2001, 2004 and lastly in 2007 hit the coastal district and damage life, livelihood, infrastructure, , communication, properties, etc. That time, people were not much aware, so the damage was huge specially the life casualty. Now people are much aware and including government many organizations are making aware building to the people. Yet, there are many areas of the district, in particularly Kutubdia, Moheshkali and some parts of other Upazilas have lack; limited dam, damaging mangrove forest, deforestation by people, erosion of embankment etc still treat for any disaster. So, the community people, experts and relevant information come to conclusion that if cyclone like 1991 hit the district, the huge damage and destruction of dwelling house, cattle head, salt cultivation, shrimp cultivation agricultural production, educational institutions, infrastructure and communication system will be much affected.</p>			
<p>Flesh flood- Under the Cox’s Bazar, the Upazila of Teknaf, Ukhia, Cox’s Bazar Sadar, Ramu, Chokria and Pekua are surrounded by the hilly areas and during monsoon or heavy rainfall occurred land slide and flesh flood. In the flesh flood of 2010 there was unexpected damage and destruction was happened in many parts of Ukhia, Teknaf, Ramu and Chokoria Upazila. It has observed during heavy rainfall the lower basin of Reju, Bakkhali, Matamuhuri and Naf rivers inundated and land slide also happened with affected the households, agricutlre etc. So, it is expected if similar flesh flood repeated, there will be huge damage and destruction in the location of Ukhia, Ramu, Teknaf, Chokoria and some parts of Cox’s Bazar will be affected. The damage may include, houses, agriculture fields, crops, roads, betel leaf cultivation will be much affected</p>	<ul style="list-style-type: none"> • Stop unplanned construction and any development. • Stop land grabbing of road side and stop construct infrastructure. • Development water extraction. 	<ul style="list-style-type: none"> • Develop forest • Develop canal system for easy water extraction. 	<ul style="list-style-type: none"> • Develop strong infrastructure and communication system. • Develop flood water tolerable rice.

<p>Land sliding/erosion: Under the district there are some points of some upazilas where the erosion are taking place. For example Ali Akbar dail, Borgop, Kaiyerbil, Lemshikhali and Uttar Dhurong of Kutudia, Dhalghata, Materbari, Kalarmarchara, Shaplapur, Kutubjum and Sonadia of Moheshkhali, low land area of Chokoria, Mognama of Pekua, Mohona of Bakkhali river low land areas of Teknaf areas most risky and vulnerable to erosion hit by tidal surge, high tide and uprising of sea level. As low lying areas, there are many areas of the district, which over flooded with 4-5 feet tidal water and erosion is occurred. If such erosion is continued, the people of coastal areas will be in risk and migration might be occurred. Apart from these, due to erosion, the salt cultivation, shrimp cultivation are severely affected</p>	<ul style="list-style-type: none"> • Stop unplanned housing in government land. • Stop hill Illegal Hill cutting • . 	<ul style="list-style-type: none"> • Stop illegal grabbing of government land. • Develop embankment • Construct embankment 	<ul style="list-style-type: none"> • Long term plan for protect land sliding or bank erosion. • All NGOs should include awareness activities
<p>Thunder storm- The thunder storm is one of the hazard for Cox's Bazar district. Being adjacent to the Bay of Bengal, every year during the month of April and May, due to formation of depression in the sea, sudden thunder storm and north-western wind hit many of the district. As the inhabitants of the Upazilas are poor, their houses are not strong enough and many are made of straw and bamboo, so the storm damage the houses, crops, many education institutions. It is expected for emerging trends of increasing changed global climate frequency of thunder storm will increase</p>	<ul style="list-style-type: none"> • Awareness building the community people. • Encourage for build house strong. • Motivate to take shelter in the centre. • Announce warning 	<ul style="list-style-type: none"> • Awareness on climate change • Encourage to move shelter. 	<ul style="list-style-type: none"> • Aware on global warming. • Government to build solid foundation of infrastructure of schools and health centre.
<p>Salinity: For Cox's Bazar district the salinity is one of the hazards. The salinity found excessive during the months of December to May. During the rainy season the proportion less than other season of the year. Agriculture sectors affected during winter time and the pure drinking water scarcity is found as well due to increasing amount of salinity. There are some reasons that salinity is increasing and become hazard for the community</p>	<ul style="list-style-type: none"> • Repair and build embankment. • Establish water extraction system. • Free of water logging 	<ul style="list-style-type: none"> • Construct and repair switch gate. • Create awareness among the salt cultivator. • Develop saline water tolerable rice. 	<ul style="list-style-type: none"> • Create awareness among the community people • Ensure law and justice for ill doer.

<p>people. The shrimp farmers bring saline water from the sea, and many areas of sea side being without proper dam or embankment the saline water entered in the river, canal and pond which contaminated the water making scarcity of pure water. Mostly the areas of Kutubdia, Moheshkhali, Pekua, Teknaf and some parts of Sadar upazilas suffer from the salinity problem. The salinity problem getting worsens day by day, and if it continues the poor people will suffer much in many ways.</p>			
<p>Water logging- there are many places of the district having high land and water can't stand for longer time. However, for excessive rainfall in the hilly areas, the water logging is created in the many areas. Due to this water logging the villagers face difficult for their regular movement from one place to another. Sometimes, in the low lying area the water logging occur due to high rise tidal surge, rising of sea level, lack of proper water management system etc. As a result, the communities people suffer in many ways of movement, firming, fishing, decompose of vegetable, water contamination etc. So the hazard can be prevented through making guide wall, making dam and forestation in the road side</p>	<ul style="list-style-type: none"> • Excessive rainfall • Due to lack irrigation system. • Due to establish of unplanned shrimp hatchery • Filling of canal, rivers etc. 	<ul style="list-style-type: none"> • Due to lack of culvert/switch gate • Due to lack of awareness among the hatchery owner. • Due to lack of saline water tolerable. • Being most of agriculture lands are at low lying areas. 	<ul style="list-style-type: none"> • Due to lack of initiative related department of government including the water development and agriculture department.
<p>Attack of wild elephant: For Cox's Bazar district the wild elephant is one of the hazards. Under the district there are forest areas under the upazila of Ramu, Chokoria, Ukhia and Teknaf in which the wild elephants are living since long. Every year, there are a considerable number of human casualties by attacking wild elephant. Moreover, sometime the huge of herd of elephant entered the locality and eaten up crops, fruits, and damage houses. So, economically, the poor farmers are losing a lot which needs care and support</p>	<ul style="list-style-type: none"> • Form group to drive the elephant herd. • Building strong fens of agriculture field. • Take support from forest department 	<ul style="list-style-type: none"> • Awareness about elephant movement time and area. • Take initiative of guarding in most vulnerable areas. 	<ul style="list-style-type: none"> • Increase reserve forest. • Take initiative for bio diversity promotion • Develop wild life areas separately.
<p>Earth quake- The earth quake is one of the important hazards for the whole</p>	<ul style="list-style-type: none"> • Awareness rising for 	<ul style="list-style-type: none"> • Prepare medical team. 	<ul style="list-style-type: none"> • Encourage people

<p>district. Being the district is formed with a diversified social formation, and as there is hill, mountain, low land areas, many ups and downs, sea side etc. So, considering the overall scenario the Cox's Bazar district is at risk of earth quake zone. For example during 1997, there was an earth quake on 22 July and it hit the district. During that time, 7 people died and around 200 people were wounded while many more damages occurred of households and institutions. In the same time, for the areas of Moheshkhali, Kutubdia and St. Martin, vulnerable to Tsunami if the earth quake hit</p>	<p>community people.</p> <ul style="list-style-type: none"> • Develop rescue preparation. 	<ul style="list-style-type: none"> • Training for volunteer • Mass awareness on earth quake. 	<p>for strong housing endurable to the earth quake</p> <ul style="list-style-type: none"> • Establish earth quake tolerable education institution.
--	--	--	---

3.3. NGOs development plan:

SL	NGO	Activity on disaster	No of beneficiary	Duration of program
1.	Bangla-German Sampreeti	Disaster Management program and climate change and environment	Inhabitant of all upazilas	September, 2014
2.	SHED	Inani forest protection, disaster management and climate change	11333 persons	2009-2015

Instructions on implement hazard planning

4.2.1. Keep volunteer ready

- At the ward level led by UP members volunteer group will be formed
- Information and warning message are announced by the volunteer in the villages.
- Training to organize for volunteer to perform specific duties such as signal, alert, message, rescue, remove and shelter management, risk reduction etc.

4.2.2. Publicity of warning message

- Each UP member will ensure to inform the warning signal in every houses under his/her ward.
- Until danger signal 5, warning announcement will be made in every hour. As soon as great danger signal is announced in the radio, the miking will be continued along with ringing bells of every schools and madrasha has be organized.

4.2.3. Take the people to shelter

- After announcement of radio, television to remove the people from the risky areas, each UP member will take initiative to move public with the help of volunteer.
- As soon as great danger signal 8 is announced, announcement will be made by miking to take shelter in the shelter centre and if necessary the volunteer will force the people to move. They must tell which areas people will take resort at which shelter.

4.2.4. Rescue and provide first aid

- Most risky areas should be handed over the responsibilities tot the respective district/upazila disaster management committee.
- For rescue activity under the management of district/upazila disaster management committee a permanent fund will be organized.
- Temporary health will be set up.
- People those took shelter in the centre, measure has to be taken to send sick person, children, old aged and pragnent women to hospital.
- All relevant tasks regarding burial of body has be taken care by the UP members with the help of volunteer.

4.2.5. Management of Shelter centre

- Ensure necessary repairment of shelter centre earlier than season started.
- Define specific centre to take shelter during emergency period.
- To ensure pure drinking water and other facilities.
- To assist the community people to take their resources (livestock and other items) to safety places.

4.2.6. Keep boat ready

- The disaster management committees of district and upazila will keep a list of engine boat and where and which are to be utilized during disaster has be organized.
- The boat owners will be cooperated in this regards.
- The mobile numbers of boat owners and boatmen will be preserved at control room.

4.2.7. Assesment of damage, prepare requirement and submission of report-

- After 24 hours of disaster hit, SOS format and within 7 days a D format shall be submitted to the UP Chairman.
- The UP chairman with the help of secretary, will compile all wards and will submit to the chairman of Upazila disaster management committee.

4.2.8. Coordination of Relif Operation

- The UP Chairman shall coordinate with all the team of relief and rehabilitation works. The amount of relief and rehabilitation shall be recorded of any group come from outside. The control shall inform the team their specific working areas.
- Union disaster management committee will take measure to distribute relief materials among the community people.

4.2.9. Storage of dry food and life saving medicine

- For instant distribute and support, dry food and medicine shall be collected from the local bazar and to be storaged.
- Rice, dal, floar, old etc and materials like tin, parak, nylon rope etc will be collected from the local market.
- With the help of health assistant and family planning officer, list of necessary medicine has to be prepared and to be procured from the local market.
- The UP chairman will take care of necessary transportation, rickshow, baby taxi to carry relief materials and movement of relief workers.

4.2.10. Treatment of cattle head and injection

- Collect necessary medicine from Upazila Livestock office considering the situation, and store at union parishad or health centre.
- Organize necessary training for the members of union disaster management committee on livestock treatment.
- If needed the experienced person of the union can be involved with the task of livestock treatment.

4.2.11. Arrangement of demonstration

- To organize demonstration session on alert warning/early signal, removal, rescue and operation of relief works.
- To organize demo session regular basis in the cyclone/flood prone areas.
- To organize demo session to task the preparation involving community people during month of April and September.
- During demo session, the issues of taking of sick people, women, children to the shelter will be considered with special emphasis.
- The demo sessions on taking people to shelter in most risky areas should be organized in the real spot, rather having the demo in UP office.

4.2.12. Operation of Emergency Control Room

- Emergency control room will be formed at district, upazila and union levels as soon as disaster hit/strike. And 3/4 persons volunteer, police, anser and chowkider will be on duty of the centre all times.
- The secretary and responsible persons will be on duty all time. The control room will be responsible for 3 volunteer groups by rotation and each team will consists of 3 members.

4.2.13. Shelter/Safety place

- The shelter will be selected those areas/place far from river erosion and not to be inundated by flood water.
- Specific place, local school, college, government and non-government institution, high road, embankment can be utilized as shelter.
- Every shelter should have detailed description.
- Should be demonstrated in the board.

4.3. List of safety place of Cox's Bazar district is attached in the Annex.8

There are 732 shelters under 8 upazilas of Cox's Bazar district. Under the Teknaf upazila there are 70 (school-cum-shelter-49+cyclone shelter centre-6+government & non-government institution-15). Under Ukhia upazila there are 41 (School cum cyclone shelter centre-31+government & non-government institution-10). Under Cox's Bazar Sadar upazila there are 161 (school-cum-shelter-98+cyclone shelter centre-7+government & non-government institution-7+ UP Bhaban-3). Under Kutubdia upazila there are 111 (Kellah-3+Kellah cum cyclone shelter-12+school-cum-shelter-52+cyclone shelter centre-33+government & non-government institution-11). Under Chokoria upazila there are 116 (School cum cyclone shelter centre-72+government & non-government institution-44). Under Pekua upazila there are 85 (School cum cyclone shelter centre-42+ cyclone shelter cum government & non-government institution-43). Under Ramu upazila there are 66 (School cum cyclone shelter centre-61+ cyclone shelter -5).

4.4. Formation of Shelter Management Committee

The shelter management is an important part of task for disaster management committee. Due to lack of proper and in time maintenance many shelter become useless. So, the shelter management has been included in the disaster management planning.

Why shelter management-

- To protect life and resources during disaster.
- To save the life of animal.
- To ensure usages and maintenance of the centre.

Shelter management committee-

- The member of the shelter management committee will be 7-9 members.
- The committee will be formed involving UP chairman, social elite, reputed personal, teacher, NGO workers, staff, land owner and various volunteer.
- With the consent of local people this committee will act as Management committee.
- At least 1 female should be in the committee.
- Describe the total responsibilities of committee member.
- With the help of local people the committee shall take care of the shelter and manage them properly.

- Committee will meet periodically and keep the record, and decision will be delivered with specific timeframe.
- The list of committee shall be included in the disaster management plan.

Places to utilized as Shelter-

- Constructed shelter
- Local school and college
- Government and non government institutions
- High land road.

Issues to be taken care of Shelter-

- The tent/polithin/ORS/fitkiri/some urgent medicine/water refinery tablet/belching powder etc should be stored properly.
- Keep arrangement for boil water
- Sanitation arrangement (separate for female)
- Separate living arrangement of male and female
- Ensure security
- Ensure enough lighting?
- Ensure hygienic of the shelter
- Enlisting the people, list of stored item of goods, and return during leaving the centre.
- Keep arrangement of dry food and medicine for settlers.
- Keep arrangement for women, children, old aged, people with disability in the shelter.

Use of Shelter-

- The shelters are mostly use taking shelter by the community people during the disaster.
- Apart from disaster, various social development event can be organized at the shelter.
- Shelter can be utilized as primary health care centre.
- Can be utilized as adult literacy centre and school house.
- Can be used as wireless station.

Maintenance of Shelter-

- Each shelter should be properly maintained, in particularly keep neat and clean.
- It should be taken initiative locally not to damage the door and windows of the shelter.
- Tree plantation shall be organized surrounding of shelter
- Except use time, the shelter should kept locked.
- The shelter management committee should be formed as per guidelines
- The list of shelter should be attached with the disaster management plan.

Under Cox's Bazar district all shelter has committee. The detailed list of committee with responsible persons and their mobile number is enclosed in the **Annex-4**

4.5. List of Resource of Cox's Bazar district (can be used during disaster):

As resources of the district which are usable during disaster time, such as kella, kella cum cyclone shelter, school cum cyclone shelter, cyclone shelter centre, union parishad bhaban, union family planning and health centre. A briefed detailed of the resources are given below:

Infrastructure/ Resource	Quantity	Responsible Person	Brief Description
School Cum Cyclone Shelter	514 under 8 upazilas	Relevant head master, chairman or members of union and member of shelter management committee	Under the 514 centre at least 4,90,500 people can shelter. The shelter needs repairmen to use as school and other social event.
Cyclone Shelter	234	Local elite, chairman or members of union and member of shelter management committee	At least 1,86,000 can take shelter under the 234 centre and the shelters require repairmen to use as school and other social event.
Union Parishad Bhaban	22	Union Parishad Chairman	Under the 22 centre at least 17,500 people can take shelter
Union Health and Family Planning Centre	20	Relevant health office, chairman or members of union Parishad	During disaster at least 10,000 people can take shelter
Mega Phone	200	Under CCP team leader and Union Parishad	Most of the equipments have become old and they need placement.
Siren	100	Do	
Radio	200	Do	
Bye Cycle	-	Do	
Rain Coat	300	Do	
Helmet	300	Do	
Gambutt	30	Do	
Stretcher	10	Do	
Life Jacket	500	Do	
Torch Light	100	Do	
Truck/Bus/Boat	80	Owner	

4.6. Funding

Income of Parishad

a. Own source

- Tax on housing
- Trade, professional and income on earning
- License and permit fees issued by Parishad
- Lease (bazar, ghat etc)
- Transport tax
- Income from resource
- Amusement tax
- UP general fund-
 - Birth certificate
 - Death certificate
 - Waris certificate
 - National ID Card

b. Own source

- Establishment
- Development (LGSP)
- Local government (Upazila)

- Others
- Establishment
Honorarium of chairman and member
Chairman (5person) per: Gov't 1475 and from Parishad
MUP(60 person) per" Gov't 950 from Parishad
Secretary (scale) 5 person
Dafader (5 union) per
Village police (5 union) per
- Land transfer 1%
- Others

c. Local government source

d. Non government organization

(The funding sources as prescribed as not available from the district administration under 4.6)

4.7. Work Plan Update and Testify

1. Planning Follow up committee
2. Planning Implementation and Maintenance Committee

Planning Follow up committee

7	Md. Mobarak Hossain	District Relief and Rehabilitation Officer (Additional Charge)	0341-64254

Responsibilities of Committee:

- Every year during the months of April/May the existing plan has to be updated with necessary deletion and addition through whole assessment. The secretary of the committee

will take the initiatives. After each disaster the management drawback has to be analyzed and update with necessary amendment.

- Every year during the month April/May on the national disaster day demonstration will be organized as per guidance of disaster bureau.
- The disaster management plan has be approved by the district disaster management committee.
- Implementation shall be monitored.
- Communicate with different organization.

Fifth Chapter: Rescue and Rehabilitation Plan

5.1. Assessment of Loses:

Due to context of geographical locations, the different development areas of the district are affected by disaster. Through analyzing of over disaster history and other hazards of the district, the loses have been briefly elaborated below:

Sector	Description
Agriculture	Agriculture sector is the most vulnerable to any kind of disaster of the district. The cultivable land, seed bed, rice field etc. are affected often affected by the all kinds of disaster like cyclone, tornado, flood, flesh food, thunder storm, salinity, water logging and so on. So, it is expected that if there repeated the cyclone like 1991 which speeded with 200-220 kilometre, as such almost 70% agriculture production of the district will damage and to be affected seriously, and estimated that the economical loses will be at least 20 crors taka. In the same time, with that similar cyclone 70% betel leaf cultivation and production of the Cox's Bazar will be much affected. On the other hand, flesh flood similar 2010 is happen again in the district, it is estimated that at least 50% agriculture field and production will fully be washed out. Unlikely, due to heavy rainfall will damage 40% of rice production and 500 acres of betel leaf cultivation will be severely affected. Similar due to water logging a huge areas of Moheskhal, Kutubdia and Pekua areas agriculture production is affected. Due to salinity expansion and inclusion, at least 20% agricultural firming land will be affected under upazilas of Kutubdia, Moheskhal, Pukua, Chokoria and Cox's bazar Sadar areas.
Fisheries and Shrimp Culture	Disaster always affects the fishery sector. Infect this sector has a important role on economic advancement of the areas. And it has plaintive resources of fishery for the district. However, due to disaster like cyclone, tornado, flood, water logging, land sliding/erosion the fish industry is affected much. It is estimated that if cyclone like 1991, 1994 and 1997 are repeated at 29 hatcheries with economical lose of 400 crors of taka, similarly, with the effect of thunder storm at least 10% fishes will damage in rivers, canal and sea.
infrastructure	Disasters like cyclone, excessive rainfall, flesh flood, tidal surge and along with thunder storm damage infrastructure sector which is proven factors of previous experience of the Cox's Bazar district. For better understanding some figures and data can be placed. With the experiences of 1991, it was a huge destruction which was much severe in history of Cox's Bazar including the human casualty of 4,09,224 persons. So, the similar assessment and assumption shows that if similar of disaster hit repeated the district, then 300 km embankment will be affected, 15 km marine drive road may collapse, 150 switch gates, 200 bridges, 1,500 culverts, 3,047 km muddy road, 859 km semi pucca and 100 pucca road will be affected severely. Mostly important 75% educational institutions will be damaged. At least 100 crores amounting lose may happen in the electric communication. Due to heavy rainfall and flesh flood it is expected that 30% low cost houses may be damaged, while 35% dwelling houses will be affected by thunder storm.
Plants	Due to natural disaster the plants and nature suffer a lot. The trend of declining the number of tree has the direct to impact of disaster effect. The cyclone, flood, thunder storm, excessive heat and rising temperature growing the environment imbalance directly affects the plants and ecological life.
Water	For the reason geographical location the Cox's Bazar has scarcity of drinking water. During the time of cyclone flood, tidal surge and high tide the sources of

	pure drinking water such as tube well and deep wells will be inundated and there will be crises of pure water. In addition to this, the salinity in the water contaminated the water of pond, canal and river too which will create long term crises and contamination of water in the district.
Livelihood	The natural disaster and hazard like; cyclone, tornado, excessive rainfall, flesh flood, tidal surge all affected to the livelihood of ordinary people. The consequences of disaster and hazard have direct effect on livelihood promotion. Mostly those who are directly involved with agriculture, fishing, shrimp, daily labour and salt cultivation are seriously affected by the disaster and hazard.. All these sectors involve the community people and all livelihood professional stakeholders. Finally, there 50% of people will be affected livelihood profession if the cyclone like 1991, 1994 or 1997 is repeated, or the flood like of 2010 occur again.
Communication	As result of cyclone, tidal surge, thunder storm, earth quake etc. the communication system is affected much, in particularly, bridge, culvert, road, high ways, telephone line, electricity pole etc. will be affected and damaged by the natural disasters if the disasters like 1991, 1994, 2010 are repeated in Cox's Bazar district.
