

Upazila Disaster Management Plan

Upazila - Morrelgonj, District - Bagerhat

Prepared by:

Upazila Disaster Management Committee, Morrelgonj, Bagerhat

Coordinated by:

July 2014

Supported by:

Comprehensive Disaster Management Program (CDMP-2)
Ministry of Disaster Management and Relief

Preface

Bangladesh is the most disaster prone country of the world due to its geographical situation. Peoples of Bangladesh have need to carry out their lives by surviving against the disaster all over the year. Enormous damage of life and livelihoods is not new incident for Bangladesh due to having ruinous storm and cyclone. In addition we lose our agriculture, health condition, sanitation, economy, infrastructure, environment due to another disasters including flood, drought, excess rainfall. Several initiatives have been taken by present government to by building capacity of root level vulnerable community considering reality of these kind of disaster. As a part of continuation of action plan, preparation of disaster management programme at upazila level have been started under Comprehensive Disaster Management Programme (CDMP) of Ministry of Disaster Management and Relief, GoB.

Main objectives

Main objective of Disaster Management plan is to raise mass awareness on disaster and risk. It will help to find out realistic approach to mitigate risk at family, community, union Parishad, Upazila Parishad and Upazila administration level. In addition, It will help to implement shifting, rescue, demand finalize, relief distribution and rehabilitation plan which are included in local disaster management plan. This plan will act as a comprehensive plan for disaster management committee and related sectors (GoB, NGOs and INGOs, donors etc) and also give directions to related sectors to implement their plans.

Considering this objectives Rupantar a development organization have completed a plan with the help of CDMP guideline and consultation with Morelganj Upazila Disaster Management Committee. In this prepared plan all information of Morelganj Upazila including infrastructure information are included that become a comprehensive action plan of this Upazila. Due to this action plan it will easy to take any mitigation plan before disaster happened. In addition, I am requesting to all Govt. and NGOs to consider this plan with their respective development action in the question of rehabilitation and rescue. Hope, this plan will act an important role in disaster management at Morelganj Upazila.

Morelganj, Bagerhat

Why Disaster Management Plan

Bangladesh is the most disaster prone country of the world due to its geographical situation. Peoples of Bangladesh have to survive their life against the storm and tidal surge all over the year. There were no action plan against the disaster at respective upazila and district level though every year coastal area of Bangladesh is affected by early mentioned disaster regularly. Moreover, there is no effective instruction and action plan to take preparation and face disaster effectively. Under these circumstances this disaster management plan has been prepared as a part of comprehensive disaster action plan for Morelganj Upazila. Rupantar a development organization have completed a disaster management plan for Morelganj Upazila with the help and instruction of CDMP under Ministry of Disaster Management and Relief, GoB. Main objectives of this plan are- Awareness building at family and community level on risk of disaster; to find out realistic approach for reducing all kinds of risk at family, community, union parishad, upazila and district administration; to exercise of implementation of locally prepared disaster action plan that helps to rescue, shifting, need assessment, relief distribution and emergency rehabilitation.

This prepared plan became a complete plan by incorporating all information of Morelganj including infrastructural maps and information. So, it will play as an instructive model for any pre disaster risk reducing plan. As well as I am requesting to all to consider this plan with post disaster rescue and rehabilitation activities related development activities implemented by Government and NGOs.

I believe, this plan will play an important role on disaster management activities at Morelganj It will also play important role to conducting risk reduction and capacity building initiatives for vulnerable community of Morelganj.

Annex-6: Some important programme list broad casted in Radio	73

First Chapter: Local area Introduction.

1.1 Background:

British East India Company established an administrative centre at Murali in Jessore district during the time of 1780-81 AD after starting the British rule. The Sundarbans was divided into several segments and provided to the land lords for cultivation. The East part of the Sundarban was given to land Lord Kalinath Munnar for 33 years. But the government rules for new instructions for the cultivation again being failed of land lord Kalinath Munnar. Then an English widow named Mrs. Morela took that land for her four sons. Among these Robert Morela, Thomas, and William three brothers reached Soralia through Pangusi and Biskhali river and built houses by cleaning the jungle. Mr. Morrel planting the area and established a market just 1 decade's labour. The market gradually becomes the special river port and trade centre.

Bangladesh is one of the most disaster prone areas in the world, however, around the country among 64 districts Bagerhat is one of the most disaster prone area.

Previously, devastating cyclone Sidr and Aila seriously hit in this district, property and assets have been affected dangerously.

Beside, agriculture, infrastructure, the environment, including the different sectors have been severely damage.

Cyclone and heavy tidal wave are major disasters in this area. Although, almost every year this district and this upazila is affected by the disaster but there is no action plan.

There is no effective action plan and preparation for facing the disaster and initialise Suggestion no. Part of the overall disaster management and disaster management plan is prepared for Morelgonj upazila to face catastrophic situation.

1.2 Main objective of the Plan:

- Create mass awareness on disaster and risk at family and community levels, besides, to find out a better and a realistic solution in reducing all kinds of risk at family, society, union administration, Upazila and district administration level.
- Through the use of local resources as far as possible to reduce the risk of initiatives and develop the measures performing Implementation method.
- Practice and apply the made plans locally for remove, retrieve, calculate instant relief system and rehabilitation measures.
- Prepare a strategic document for a specific area and a specific time to be ready.
- Disaster Management Committee and the corresponding sector (government, international and national NGOs, a donor, etc.) will act as an overall plan.
- Provides guidance closely in disaster management planning and implementing on disaster management.
- Community participation in disaster management in the corresponding, effective partnerships and to be awake to feel ownership.

1.3: Introduction of local area: There are Kochua and Bagerhat upazila into the northern side and Sharankhola is located in the southern side where Vandaria & Mothbaria is located in the western side, on the other hand, Pirojpur sadar is located in the east side.

Geographical condition of the Upazila: 2888 hectares of high soil, medium-high -17565 hectares, 11372 hectares of medium and low, low, flat land is -700 hectares (Source: Upazila Agriculture Officer)

Standing in a forest districts, however, the district forestry department has created some of the forests. There is no other mining like oil, gas, coal and so on. Moreover, the salinity in the water are found almost all unions in the upazila. Again, there are some sources of sweet water. Due to the demand for drinking water most of the community people resolved their needs by collecting rainwater and the pond water in dry season. Producing Aus rice and vegetable are badly disrupted for salinity winter.

Size: 461 square kilometers (44.580 hectares)

Distance 20 km from the district.

1.4 Infrastructure and information of infrastructure

1.4.1 Infrastructure:

- Embankment: 14.83 km (35/1 poldar) There is an embankment from kumarakhali to Bandaghata bazaar through Sonnasy khal which is 6 feet high. However, the sluice gate are active in kumarakhali canal, canal in Barisal, sannyasi Canal, Chairman Market Canal, Canal palimangala, Zahur Ali canal, canal bandaghata and so on.
- There is an embankment 15 km (daibanjahati epicenter) from cholamabariya to Sona Khali Khal through Debraj which is also 6 feet high. The sluice gate are active in Hospital adjacent canal, cholamabariya Canal, Canal mangaleratata, sonakhali canal, canal debaraja (Info-Bagerhat Water Development Board, the information providers – SA Habib).
- Sluice Gate: 7+6=13
- Bridge: 78,
- Culvert: 664,
- Road: Metalled road- 7827 km, Un metalled road-25683 km, HBB/ soling road 19723 km = 53226 km. (Information morrelganj LGED, provider : S A Sirajul islam)
- Irrigation: There is no other than the irrigation system is active but 27 T (Block)
- Hat Bazaar: Total 49 (Big/Small) (Source: Statistic office-Morrelgonj).

1.4.2 Social Resource:

- Household: There are total 75472 families in the upazila, among these farming families are 55,876 (32% are building and other type is 68%). Use bricks, sand, cement, rod, wood, bamboo, wood, chonapata, Golpata as housing materials. All types of house are built by the community people. However hut made of mud houses chaunii pata are seen majority.
- Water: There are 2286 has spotted of shallow tube well (Unhelpful 538), deep tube well 10 active, 1 is in Jiudhara Union. There are over 770 PSF are active. Moreover, there are 418 rain water harvesting system, while 132 is active. In the meantime, 60% sweet water and 40% salt water (95% people depend on the pond / PSF and 5% of people drink tube-well water). During the time of Flood / tidal wave there is no suitable food and water wells.
- Sanitation: 95% households have access to sanitation system. During the flood and time of tide sanitation system is become useable except 2%. (Source: Public Health- Morrelgonj)

Upazila forestry department of the Morrelgonj upazila took the trees to the forest and they are Arjun, Mahogany, reinatti, children, neem, Kadabelera, akasamani, acacia, uriama, glass, apple,. (Data Source: Upazila Social Forest Department).

1.4.2 Climate and Weather:

Rain falling trend: During the year of 2013 the total amount of rainfall was 636 mille mitre rain fall where the on average was 1.74 mille mitre. On the hand, according to the Upazila agriculture officer amount of rain fall was 246 mille mitre in Kharif-1 and 361 mille mitre rain fall was in Kharif-2 while there was only 29 mille mitre rain fall was in Rabi session.

Temperature:

Highest 40 to 42 degree Celsius are common during the month of April and May. On the contrary, during the winter session the lowest temperature in this area is 8 to 10 degree Celsius. However, at present in the summer season the hot weather is filled bit high than the other time. It is said analysing the databases that the rate of temperature increase in the past 10 years. (Data source; Khulna Weather Office).

Layer of underground Water: There are different water layer in different unions in Morrelgong Upazila. But there is no crisis in case of drinking water and water for irrigation during the dry season.

1.4.4 Other

- **Land and use of Land:** 2888 hectare high land in morrelganj upazila, where medium high land 17565 hectare, 11372 hectare medium low land, low land 700 hectare, and the total 32525 hectare. (Agriculture, environment, 13land area is 44580 hectare).
- **Accurate agriculture land are 27051** hectare, one crop 18051 hectare, two crop 7211 hectare, three crop 1790 hectare and the total amount of crop land is 37,871 hectare. The 140% crop silence.
- **Agriculture and food:** Layout based on the major crops of the land (agricultural).

SL	Description			Crop layouts based area (Hectare)
	Rabi	Kharip-1	Kharip-2	
1	Fallen	Fallen	Transplanted aman	15265
2	Boro	Fallen	Fallen	115

11	Boro	Aus	Fallen	240

- Food:

SL	Description	Year	Year	Year	Rema
1	Total Population-294576	2010-11	2010-11	2010-11	The rate of increasing population 0.59%
2	Total demand of the population(per person demand-487 gram)	63510	64240	52362	
3	Seeds, cattle food, and reducing the demand for waste	7400	7660	6440	
4	Total quantity of food demand (2+3) metric ton.	70910	70910	58802	
5	Total amount of food production (Rice+ Wheat+ Corn) metric ton	594007	62500	55619	
6	Surplus (+) Deficit (-) metric tons	Shortage	Shortage	Shortag	

- River: There are four rivers have been flowing into the Morrelgong upazila and they are 1. Baleswar 2. Panaguci 3. Daratana and 4. Ghasiyakhali. Farmers have collected water for irrigation from the rivers draining the and local businessmen have used small boats to carry their goods through the river. On the other hand, the local people are using water to bathe and cook for cooking purposes. Depth and water flow of the rivers in the past due to its extensive use of water for agricultural activities, trade and commerce, from one district to another district, the movement of people, fishermen fish retrieval, family cooking and bathing in the rivers people are greatly benefitted.

(Source: Department of Agriculture expand.)

- **Pond:** There are 107 pond in this upazila. The pond under the CDMP II -? T (five) of the pond has been performing excavation activities.
- **Canal:** there are 51 canalare flowing through the 16 unions. However, among these 10 canals are notable.
- **Bill:** There are bill in this upazila. (Source: Department of Agriculture expand.)
- **Haor:** There are bill in this upazila. (Source: Department of Agriculture expand.)
- **Salinity:** There are three suitable seasons are available for agriculture are presented in the upazila . However, the season in of Kharip-1 is in between 16th March to 15th July. Then the rate of salinity increased to 6 – 10%. During this time, in this upazila the half of the total land becomes unusable for agriculture.
- **On the other and kharip-2** season is started from 16th July to 15th October. During this time the salinity stay in the water between 1 to 3% and almost 100% land come under cultivation.
- There is no actual different in agricultural production except disaster. Besides, 16th October to 15th March is Kharip-3 season. During in this kharip-3 the salinity rate is presented in the water between 4-8%. For the period of Kharip-3, 75% lands are used for Boro paddy in the summer, on the other hand, in the winter season vegetables and other cereal.
- **Arsenic Pollution:** The arsenic is presented more or less every union in the upazila. However, there are moderate levels. (Data source: According to the survey of 2005 , department of Public Health Department.)

Second Section:

Disaster, Hazard, Vulnerability: Relatively the risk of natural disaster is high due to its geographical location. Therefore, the people of this upazila are victim fatally because of big disaster like Aila and Sidr. However, it is informed from the local government officials, local elite persons and from the community people that although the cyclone and the tidal wave is the main disaster but, in few years the water logging is created due to heavy rain fall which turns into disaster.

Widespread human suffering increases because of poor extract system which most of the time create water logging. Moreover, agriculture related economy of the area, fisheries production, people and their livelihood, health, education, infrastructure are severely affected by the disaster.

Name of Disaster	Year	lose of profit	Sector
Cyclone	2007-2008	15,65,90,000/=	Human resource, agriculture, Infrastructure, and health
River Erosion	2010-2013	10 croc taka	Agriculture, Infrastructure, and Communication
Salinity	2008	5 croc taka	Fisheries & Agriculture.

(Source: Upazila Department of Agriculture expand.)

2.2 Hazards of the unions:

'Danger' is usually used as in the sense of 'potentiality'. In other words, it is such a possible and unusual event that could be occurred because of natural, human or technical error which may be hampers the normal lives of people and the environment as well.

Morrelgonj is one of the coastal upazila of Bagerhat district. Bagerhat is also located adjacent to the sea. Although Bagerhat district is 80 -90 km away from the sea, but there are some big rivers of Sundarban following throughout this district to the sea. Considering the situation Bagerhat district is more or less under risk of disaster. Morrelgong upazila is as under risk as like other upazila of this district. Disaster like SiDR is very risky for this district. Regarding the situation of cyclone agriculture is one of the vulnerable sector in this area, however, this district has played a vital role to produce agriculture and fisheries production in Bangladesh. There are 70 to 80 percent people are involved directly and indirectly with agriculture and fisheries. So, the other sector like infrastructure, communication, education, and environment are under vulnerable like agriculture.

2.3 Different hazards and its present and future scenario:

Morrelgonj is one of the coastal upazila of Bagerhat district. Bagerhat is also located adjacent to the sea. Although Bagerhat district is 80 -90 km away from the sea, but there are some big rivers of Sundarban following throughout this district to the sea. Considering the situation Bagerhat district is more or less under risk of disaster. Morrelgong upazila is as under risk as like other upazila of this district. Disaster like SiDR is very risky for this district. Regarding the situation of cyclone agriculture is one of the vulnerable sector in this area, however, this district has played a vital role to produce agriculture and fisheries production in Bangladesh. There are 70% to 80% percent people are involved directly and indirectly with agriculture and fisheries. So, the other sector like infrastructure, communication, education, and environment are under vulnerable like agriculture.

1. Morrelgong upazila is one of the disaster prone areas. During the time from June to October there are more or less high tidal wave hits this land that is badly effects on agriculture, fisheries, infrastructure, accommodation and communication and so on. Moreover, the agriculture land become unworkable because of salinity and sand from the tidal wave. As a consequently, almost 0.05% acre land become unusable for cultivation. However, the flood of 1988, 1998, 2007 and 2008 were devastated for the district as well as for the country.
2. River Erosion: The problem of river erosion is common in the Morrelgonj upazila. However, this problem is generally seen between the times of June to October of every year. This problem has greatly damaged the area of agriculture, corps, home, road, environment and so on, which greatly effect on different types of work, producing food and manufacture. The community people turn into homeless and the environment faces big obstacle to survive. If the embankment is not built and taking the correct initiatives for saving the upazila from the river and other hazards, then the Morrelgong Upazila will be apart in case of communication from other upazila. (*Source: Upazila Agriculture Expand Department*).

2.4 Vulnerability and Capacity:

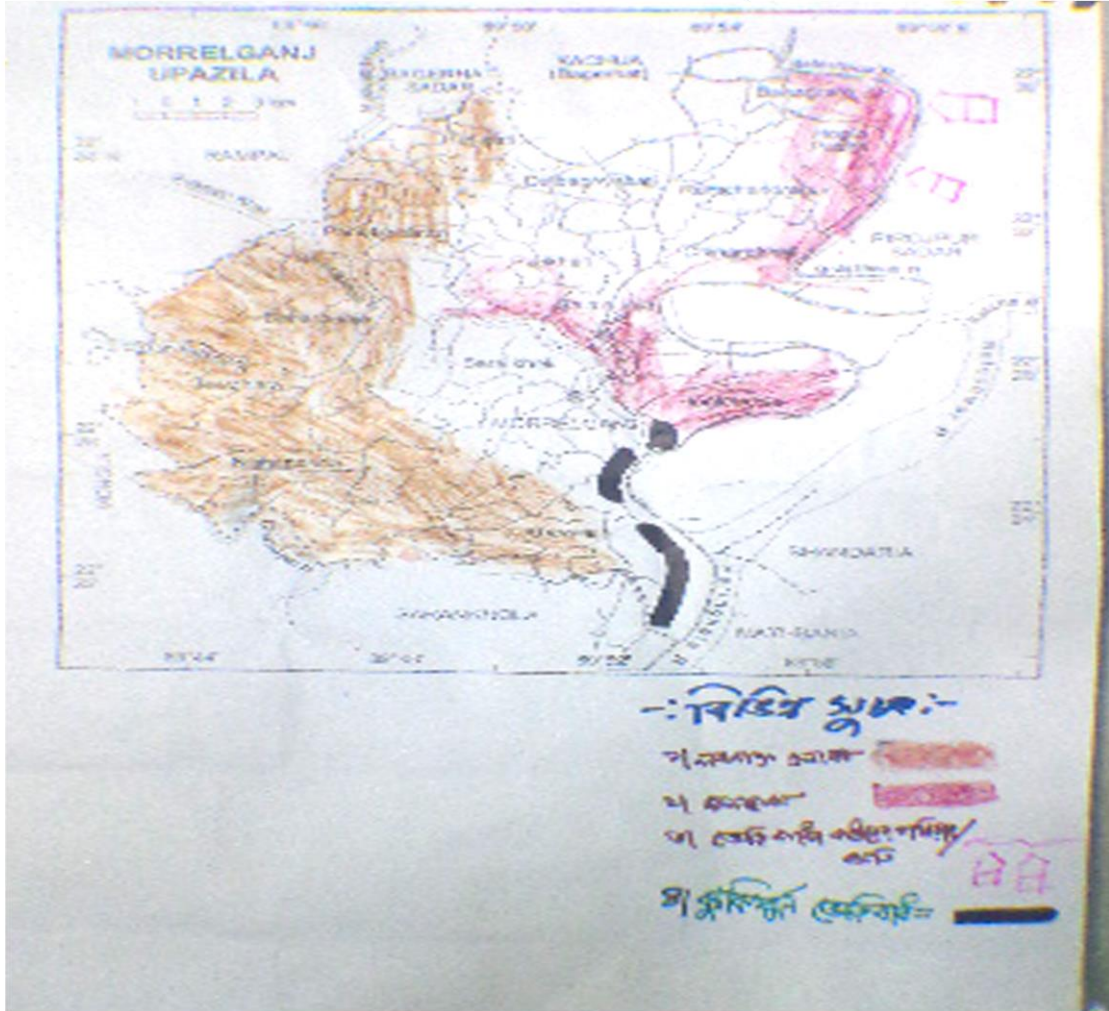

Hazard	Vulnerability	Capacity
• salinity	• Loss of Lives, houses, trees, crops , sanitation problems and loss of agricultural land	• Keep fresh water and produce salinity friendly agriculture production.
• River	• Agriculture resources are in under risk due	• Agriculture resources are saved by

Erosion	to river erosion in Khaulia union	building high embankment.
• Cyclone	• Loss of Lives, accommodation, houses, trees, crops, agriculture, cattle and spread of diseases, food problem, child education, sanitation problems are seen due to cyclone.	• Storm tolerant structures like made of high ground
• River Erosion	• Damage of road, problem of drinking water, communication problem, collapsing of education problem, problem of producing crops, Loss of health, increase of unemployment and crime insecurity.	• Plants, fake-boats, crops, animals, birds, houses, drinking water, sanitation, education, food, travel arrangements etc to keep prepare for any time and situation.

2.5 Most Vulnerable Area.

Hazards	Most Vulnerable Area	Cause of Vulnerability	Vulnerable People
Tidal Wave	Sannyasi, Kaulana, Morrelgonj, Baraikhali, Fulhata, Sonakhali Debaraja	River Erosion	35,000 people
Salinity	Jiudhara, baharbuniya, Ramchandrapur, Nisanabariyara (part), teligati (part).	Salinity	40,000 people
Cyclone	Less than the risk for the Union under the cyclone. However, more likely the land adjacent to the river. There are also quite a few parts of the embankment, which is very shaky and risk for high tidal wave which creates threat to the whole part.	<ul style="list-style-type: none"> • Geographic location adjacent to the coast. • Embankments are not high enough. • Lack of awareness. 	<ul style="list-style-type: none"> • 28000 people are very vulnerable in this area. • 37000 people in the middle of sharing risk.

সর্বাধিক বিপদপন্ন এলাকা

2.6 Major sector sequences of development plan.

Major sector sequences	Total description	Adjustment with the risk of disaster
Agriculture and Fisheries	Agriculture production is generally faces reverse obstacle due to natural disasters and climate change disasters in the region. Besides, too hot in summer, rain showers late in rainy season and cold wind streams between the winter season impacting negatively on traditional agricultural management in the region. Losing the navigability of the rivers, canals, bill water logging/ flooding occurs are seen middle of the rain fall. Farmers and agricultural crops are being lost due to the flooding caused by rainfall; consequently, it is impacting on family life and livelihood depending on agriculture. Fisheries are one of the most important parts of the economy where most of the family are	<ol style="list-style-type: none"> 1. Expand the latter techniques. II. Increased salinity friendly planting. 3. Increased intensity of land use. 4. Increased planting of high-yielding crops for short time. 5. Organized training for increasing awareness of farmers on the technology. 6. Marketing of high-value crops, planting and

	associated with the shrimp and fish cultivation. Tornado, tidal wave or any other disaster severely affect on rivers, lakes or reservoirs fisheries resource. Many times the fish of the pond, gher are washed away, besides, fisheries resource are affected for extra salinity, even shrimp and fisheries resource is virus affected.	harvesting. 7. Excavations at Canal Irrigation / extract are sure.
Live Stock	There are many families who are involved with animal husbandry in this upazila. Although, at present because of increasing of salinity and shrimp farming the rearing of cattle has decreased gradually, but, there are many families who have stilled involved with animal husbandry.	<ul style="list-style-type: none"> • Receiving the government help from upazila Pranisompad department. • Provide vaccine in time • Cultivate grass in coastal embankment and in government fallen land.
Health	Upazila health management is called to government hospital. Basically, poor and ultra poor community people have come to take health service from the hospital. However, the capacity are not adequate enough considering the demand of service.	<ul style="list-style-type: none"> • Provide training on the procedure of health service after disaster worker at union level. • Prepare a list of midwife and provide training on how to face the critical time. • Increase awareness on protecting water born diseases.
Livelihood	The livelihood status in this upazila depends on Agriculture. There are 80% of the people are engaged with agriculture, fisheries and shrimp farming. Besides, many people lead their lives on service and business. Since, the livelihood is mainly depending on agriculture, hence, the livelihood components are always in danger. This is because; agriculture is affected first by the disaster. For this reason, the livelihood status may be changed any time due to cyclone, high tidal wave or any other catastrophe, for instance; SIDR, ILA and so on.	<ul style="list-style-type: none"> • Run the safety net programs for the poor and ultra poor people. • Start multifarious intervention of livelihood. • Arrange training on disaster, risk or DRR for the cultivators and fish farmer.
Three	The rivers and canals in our country have lost its navigability due to climate change. Therefore, water logging is created by medium rainfall and this is why threes are greatly affected to grow up normally, even, many times these threes are died by water logging.	
Infrastructure	A reasonable part of the upazila are surrounded by the coastal embankment which condition is very poor, beside this, although, the sea level is increasing because of global warming, thus, the status of the embankment is not appropriate for to protect the disaster. For this reason, in many places water is penetrated by over flowing the embankment. Moreover, in many times it is seen that the embankment is also broken due to heavy	<ul style="list-style-type: none"> • The embankment should be prepared considering the present situation. • Organize embankment management committee. • Make sure the

	pressure of water. Regarding all the above mention issues the embankment is the main priority for the upazila. It is necessary to make sure the existence and sustainability. There is of course no denying that the present situation of the embankment is not good enough.	accountability of water board to the mass people.

2.13 Climate Change and potential impact.

Sector	Description
Agriculture	Agriculture production is generally faces reverse obstacle due to natural disasters and climate change disasters in the region. Besides, too hot in summer, rain showers late in the rainy season and cold wind streams between the winter season impacting negatively on traditional agricultural in this region. Losing the navigability of the rivers, canals, bill water logging/ flooding occurs are seen middle of the rain fall. Farmers and agricultural crops are being lost due to the flooding caused by rainfall; consequently, it is impacting on the family depending on agriculture. Besides, a variety of crops diseases and insects has been increasing due to change of climate.
Fisheries	There are many ponds canal, gher are washed out by cyclone and heavy rain fall. In some cases, fishes are died by water pollution, salinity which greatly affect on fish production.
Three	As Losing the navigability of the rivers, canals and bill water logging/ flooding occurs is seen middle of the rain fall. Which badly affects on three even many times these trees has been dying.
Health	The community people are affected by different kind of water born diseases such as; diarrhoea, pneumonia, skin diseases, fever, typhoid and hepatitis.
Livelihood	Almost all possible source of livelihood, agriculture land are harmed by cyclone, salinity and heavy rainfall at local level. Besides, land fertility also affected by the disaster. As a result; farmers, fishermen become unemployment. The communication and the roads are also being damage by the disaster which effects on day labour. Actually, the unemployment status has increased rapidly.
Water	Water is polluted by different stuffs like salinity, dust, dead body and so on.
Infrastructure	School, college, roads, bridge, culvert, houses and other institution are broken down by the disaster.

Third Section

3.1 reasons of Hazards: Identifying the reasons of hazards

Description of Risk	Reasons		
	Instantaneously	Instantaneously	Instantaneously
Flood	Problem of food and fresh water	Crops and accommodation problem	House and increase of different diseases
River erosion	Loss of lives, damage of house, thee, sanitation problem, increase of infertility of land	Damage of roads, communication problem, damage of crops, collapsing of education system and increase of insecurity.	Economic loss, loss of infrastructure, education system, and increase the financial cost
Drought	<ul style="list-style-type: none"> • Water shortages; • Intolerable Environment; • Reducing agricultural production; • Damage of agricultural land; • Lack of animal food; • Increased social instability; • Reduction of spreading education's normal speed by closing the institution; • Increase in unemployment and a decrease in the work stimulation; • Malnutrition; • Outbreak of the disease; • Theft, robbery, hold-up, growth, etc.. 	<ul style="list-style-type: none"> • Easier management of water; • Reduction of water layer observation and lift underground water; • Preservation of seasonal water; • Industrial / plant water purification and re-use; • Slow and preserve the steamy; • Identify drought-prone regions of the country and raise awareness among the farmers to cultivate crops as per the region; • In solidarity with the people of drought predicted and planned to address it; • Be aware of public to use the appropriate water; • To create public awareness on the issue of water resources; • Need to change the type of crop; • Be seeking the development of irrigation systems and water wastage. 	<ul style="list-style-type: none"> • Basically plants save the environment from drought weather, it is needed to plant tree around the house, the field of social organization, and bind the edge of roads. • Generally those fruit trees should be planted which can hold water for a long period was time or if it is not needed to supply water to the trees, (eg: - banana, papaya, custard apple, bell, etc.). Soybean, peanut, sesame, etc are also can be planted. • to keep preserve water in home, pond, dug water .
Cyclone	Loss of life, houses, trees, poultry, cattle, crop damage, outbreak of disease, the problem of drinking water, sanitation problems, food problems, children receive education barriers,	Damage to roads, drinking water problem, transport problem, the education system is broken, crop problems, health problem, increase unemployment; people are transferred, increased crime,	Economic loss, loss of infrastructure, high price the education system is broken, health problem, increased financial cost

		insecurity.	
Inundation	Loss of life, houses, trees, poultry, cattle, crop damage, outbreak of disease, the problem of drinking water, sanitation problems, food problems, children receive education barriers,	Damage to roads, drinking water problem, transport problem, the education system is broken, crop problems, health problem, increase unemployment; people are transferred, increased crime, insecurity.	Economic loss, loss of infrastructure, high price the education system is broken, health problem, increased financial cost.
Salinity	Houses, trees, land, waste and crop damage	Crop problems, People are transferred, damage of forestry and suffer from insecurity.	Economic loss, , increased financial cost.

3.2 Identifying the initiatives of reducing the risk.

Description of Risk	Possible steps of reducing the risk		
	Short time	Medium time	Long Time
Flood	Reduce the damage of houses, trees, poultry, cattle, crop damage, outbreak of disease, the problem of drinking water, sanitation problems, food problems, education barriers and so on.	Reducing the damage of roads, problem of drinking water , transport problem, the problem of education system, crop problems, health problem, unemployment; people's transferred problem, decreased crime and insecurity.	Decrease economic loss, loss of infrastructure, high price, save the education system, health problems as well as financial cost
River Erosion	Reduce the loss of lives, houses, trees, crop damage, agriculture land, sanitation problem and so on.	Decrease the damage of roads, transport problem, collapsing education system, health problem, crime and insecurity from the river erosion.	Decrease economic loss, loss of infrastructure, collapsing education system as well as financial cost
Drought	Reduce the problem of crops, loss of agriculture land and trees.	Reduce the loss trees, crop , people's transferred, deforestation and so on	Decrease economic loss and reduce the financial cost.
Cyclone			
Inundation	Reduce the damage of houses, trees, poultry, cattle, crop damage, outbreak of disease, the problem of drinking water, sanitation problems, food problems, education barriers and so on.	Reducing the damage of roads, problem of drinking water , transport problem, the problem of education system, crop problems, health problem, unemployment; people's transferred problem, decreased	Decrease economic loss, loss of infrastructure, high price, save the education system, health problems as well as financial cost

		crime and insecurity.	
Salinity	Lessen the loss houses, trees, agriculture land and crop problem.	Reduce the problem of crops, people's transferred, deforestation and insecurity.	Decrease economic loss and reduce the financial cost.

3.3 Development plan of NGOs;

SL	NGO	Activities on Disaster	Number of beneficiary	Number	Duration of Time
	World Vision	Raise awareness on disaster, grants and provide educational materials to poor students, arrange subject-based training for teachers, vocational rehabilitation, training and providing health service.	10,000	1	2010-15
	VDPC	Raise awareness on disaster and implement SOD (Make strength of UDMC and UZDMC)		1	2014-15
	Asroi Foundation	Raise awareness on disaster, arrange seminar, workshop, community work in SDC cyclone shelter.	1200	1	2013-2014
	JJS	Raise awareness on disaster, arrange meeting by organizing committee, present drama and video show.	600	1	2013-2014
	DDJ	Raise awareness on disaster, raise home stead and provide hole of hen and duck.	600	1	2014-2015
	JCF	Raise awareness on disaster, arrange meeting by organizing committee, present drama and video show, take preparation on disaster.	2700	1	2014-2015

(Source: Upazila project implementation Officer)

3.4 Plan on disaster management;

Disaster is natural or human-caused events that can occur suddenly or gradually. The people have to deal with disaster through the outstanding efforts.

Disaster is an extreme event or situation in a community or society which affect on the environment and it is influenced on normal lifestyle of the community. And to recover the situation of the community it is must call for outside help.

3.4.1 Pre Preparation of disaster;

S L	Activity	Goal	Potential Budget	implementation place	Possible date	How much and who will implement				Coordination with development Plan
						Upazila Administration %	Community %	UP %	NGO %	
1	Renovation of embankment	30 km	1 coro	Damage Area	2014-16	45%	1%	4%	50%	
2	Construction of cyclone shelter	100 nos	300 Coro	As per need	2014-16	45%	1%	4%	50%

4.4 Organize of the Management Committee:

Cyclone shelter is a very important part of the management committee. There are many cyclone shelter are become unusable due to lack of proper maintenance. Hence, cyclone shelters should be come into the disaster management plan.

Why cyclone shelter management?

- Save life and asset during the disaster,
- Save live stock during the disaster,
- Make sure the use and the maintenance of the cyclone shelter.

Management Committee in the cyclone shelter:

- There will be 7 to 9 member of the cyclone shelter management committee,
- The management committee will be consisted of 7 to 9 members of UP chairman, Member, Elite person, Social Worker, Teacher, NGO representative, Land provider, Volunteer will be in,
- This cyclone management committee can play role as management committee with the permission of community people,
- Woman will be the half portion of the committee,
- Sense of responsibility of the committee (about shelter of management),
- Committee will be responsible for the overall management of shelters by supporting of the Local people.
- The committee will also hold meeting continuously after a certain time, besides, every verdicts of the meeting will be written in the register and more importantly, responsibility will be disseminated and set a deadline for the implementation.
- List of cyclone shelter will be coherent with disaster management plan.

Select location as cyclone shelter:

- ❖ The shelters
- ❖ Local schools, colleges, madrasa,
- ❖ Governmental and non-governmental organizations
- ❖ High road and embankment,

Objectives of the cyclone shelter:

- ✚ Shelter tents / plastic / ORS- saline / phitakiri / some emergency medicine (Paracetamol, phelajila) water purification tablets / bicim powders.
- ✚ Keep drinking water and cooking,
- ✚ Keep sanitation system,
- ✚ Arrange different bathing place for both male and female,
- ✚ Be kept clean and trash remove,
- ✚ Make sure the security,
- ✚ Lighting system,
- ✚ The cyclone will have to be clean,
- ✚ Registration of the sheltered people, enlist of the trust goods and returned it to the people while they will leave the place,

- ✚ Disseminate the responsibility among the worker and the volunteers about the shelter management,
- ✚ Arrange human food and medical treatment for victim people,
- ✚ Special attention is given to the pregnant women, elderly, elderly, children and the disabled, ,

Use of asylum:

- ☼ Generally Cyclone shelter is used for people's safe during the catastrophe,
- ☼ Except disaster cyclone shelter may be used for social activities,
- ☼ It also can be used as primary treatment centre,
- ☼ It also may be used as a adult school
- ☼ The cyclone centre can be used Wireless stations,

Maintenance of the cyclone shelter:

- ☞ Each shelter will maintenance efficiently, particularly, The shelter should be kept clean,
- ☞ Take a positive step to save the doors and windows from the degradation ,
- ☞ Planted a number of tree into the open place of the Shelters,
- ☞ Shelters will be locked except during time of use.

Organize shelter committee as per guide line, besides, the list of the shelter management committee will be attached with the disaster management plan.

Sl	Name of the Shelter	Responsible person	Mobile	Remarks
1	Kulsum Gani cyclone shelter	Md. Golam Mostafa Khalifa	01720130255	
2	Shiraj Uddin Moslem Mobarak cyclone shelter	Moulana Moslem Uddin	01711228266	
3	Abdul Latif Howlader cyclone shelter	Abdul Hamid Sheikh	01918896558	
4	Sheikh Abdul Gaffer cyclone shelter	Abdul Haque Howlader	01911697185	

4.5 List of upazila resources (which is used during the disaster):

Sl	Resources	Number	Responsible person	brief description
1	Cyclone Shelter	80nos	UZDMC/UDMC	
2	Godaun	2 nos	OLSD	
3	Boat	233 nos	Boat man organization and local people	
4	High earth	N/A		
5	Transportation	38 nos		

4.6 Finance:

The income of Union Council are come through different sections such as; the local income tax, market-bazaar leases, canal-bill lease, other lease and trade and the trade license. However, at present the big hat-market, canal and lease arrangements are not in the hands of the union, consequently, the sources of income of union parisad of union is much less than before.

However, at the local level the government has given 1% money to the union parisad of local land sale (Land Registration) through the Upazila Parishad. Although the mean time, this money is generally used as monthly wage/ allowances for village police and the secretary are paid. To strengthen the local government Bangladesh Government has taken initiatives through the Local Government Support project where the government will provide allocation 5 to 10 lac money.

Income of Union Parisad:

There will be a fund for every union parisad,

(a) Self sources(Union tax, rate and fish),

- ☞ Tax of the annual value of the house,
- ☞ The tax on Business, career and livelihood (trade license),
- ☞ Fees for licenses and permits issued by the Council
- ☞ Received on account of lease

- Hat-market lease,
- River port lease,
- Khas ponds lease ,
- Enclaves lease.
- Tax on vehicles other than transportation ,
- Income from property ,
- Union Council General Fund

(b): **Sources of governmental grant:**

• **Development Sector:**

- ✓ Agriculture
- ✓ Health and Sanitation,
- ✓ Building and repairing of road,
- ✓ House construction and repair ,
- ✓ Development support fund (LGSP)

• **Establishment**

- ✓ Honorarium and allowances of chairman and members,
- ✓ Salaries and allowances of secretary and other staff,

• **Other**

- ✓ Land transfer tax 1% ,

(C) **Local government sources**

- ✓ The money paid by the Upazila Parishad,
- ✓ The money paid by the District Council.

(D) **Non-governmental development organizations**

- ✓ NGOs,
- ✓ CDMP

Bangladesh government and various donor agencies, non-governmental development agency, is paid directly to the local government for strengthening union councils. Further support of the union council depends on capacity, transparency, accountability and good governance of the union council. Each union council will develop plans considering major disasters. It is necessary to receive project, preparation, money allocation, implementation of the project regarding the disasters and the mitigation of the risk as if there would be no obstacle to develop the union council.

4.7 examinee and update the work plan:

Two committees will be formed in each union for legislation and implementation of disaster plan.

- I. Follow up committee of plan
- II. Implementation and maintenance committee

Planning follow up committee

Follow-up committee will be 5 (five) members.

1. Chairman
2. Secretary
3. NGO representatives
4. Members (2persons) (General Committee)

Planning follow up committee

- ❖ Disaster management plan approval should take from the District Disaster Management Committee.
- ❖ Administer and implement the plan,
- ❖ Regular contact with various organizations,

**Fifth (5) Sector
Rescue and Rehabilitation Plan**

5.1 Evaluation of damage.

SL	Sectors	Description
1	Agriculture	Emerging crops are lost due to cyclones and salinity, and Farmland become saline. Moreover, land becomes unsuitable for cultivation, decrease its fertility. Consequently, agricultural system collapses.
2	Fish	Aquaculture ponds and fields washed away due to cyclones and rains. On the other hand, the fish die for contamination and salinity. Inhibit the growth of fish and Manufacturing
3	Tree	Damaged forestry plants by cyclones and other disaster.
4	Health	A number of people have died by Hurricanes and other disaster. In the flip side, because people have been affected from water bore diseases by drinking contaminated and saline water.
5	Livelihood	Cyclones, salinity and heavy rains damaged the local level livelihoods. Agricultural land is lost and land energy decrease, besides, farmers, fisherman become unemployed during this time. Furthermore, roadways are closed to a traffic communication; consequently, transport workers are unemployed. The trade-off and economic activity is stalled.
6	Water	The water are polluted due to salinity, besides this, the sources of water turn out to be polluted because of dead bodies, garbage and so on.
7	Infrastructure	School, college, hospital, road , bridge, culvert are broken down because of cyclone, tidal wave and for other disaster.

5.2 Rapid rescue:
